WHEREAS, 33 years ago, on December 15, 1941, the heroic monument in bronze and marble, which President Franklin D. Roosevelt designated as ". . . this great triumvirate of patriots . . . ," portraying George Washington, Robert Morris and Haym Salomon, was dedicated as a national event in Chicago's historic Heald Square; and

WHEREAS, The monument—the last work of the internationally famous sculptor, Lorado Taft, himself a Son of the American Revolution—was dedicated amid the plaudits, not only of the people of the City of Chicago, but those of the State of Illinois and our entire nation; and

WHEREAS, The monument was presented to, and accepted by, the City of Chicago as a gift of The Patriotic Foundation of Chicago; and

WHEREAS, Since the dedication of the monument to the present day, the monument eloquently expresses the fundamental patriotic and historic truths that:

1. Americans of all origins and creeds participated in the building of the United States from the beginning; and
2. American civilians as well as military men played important roles in the American Revolution; and

WHEREAS, These truths—especially during these Bicentennial years—should be called insistently to the attention, not only of every American, but of the world; and

WHEREAS, Upon the occasion of its dedication the monument and its symbolism was highly commended by President Roosevelt, President Harry S Truman, General of the Army John J. Pershing, as well as scores of other outstanding leaders representing every walk of life; and

WHEREAS, The monument, in an unrivaled way, has become an enduring beacon of the unity of purpose that forged the greatness of America; and

WHEREAS, On September 15, 1971, the City Council of the City of Chicago designated the monument as Chicago's first official sculptural landmark; and

WHEREAS, On November 4, 1971, the Senate of the State of Illinois adopted a resolution, copy of which was sent to the Postmaster General, requesting that a commemorative postage stamp be issued by the Postmaster General honoring the great political truths that spell out the very foundation of our democracy, as exemplified by the monument; and

WHEREAS, On February 9, 1971, the City Council of the City of Chicago, representing its millions of men and women who constitute its citizenry, joined in the action of the Senate of the State of Illinois and adopted a resolution also requesting that a commemorative postage stamp be issued, depicting the monument and its theme, since such a stamp would fully meet the criteria of the Postmaster General and the Citizen's Stamp Advisory Committee, in that:

". . . the persons and event to be honored by the stamp are based on national interest and historic perspective . . . ";

and

WHEREAS, The Postmaster General was advised of the action of the City Council of the City of Chicago and its determination as to the national importance of the issuance of such a stamp; and

WHEREAS, The official requests of the City Council of the City of Chicago and the Senate of the State of Illinois were followed by official resolutions sent to the Postmaster General by the Commission on Chicago Historical and Architectural Landmarks and by the County Board of Cook County Commissioners also urging the issuance of this commemorative stamp; and

WHEREAS, The entire metropolitan press—the Chicago Tribune, the Chicago Sun Times, the Chicago Daily News and Chicago Today—in lead editorials, copies of which were sent to the Postmaster General, lauded this effort and added their voices to the request that the Postmaster General take steps to issue the commemorative stamp sought; and

WHEREAS, Both United States Senators from Illinois—Adlai E. Stevenson and Charles H. Percy—have expressed their deep interest in this endeavor and have requested, a number of times, that the Postmaster General issue the commemorative stamp; and

WHEREAS, U.S. Congressman Edward J. Derwinski, leader of the Republican delegation from Illinois, and U.S. Congressman Daniel Rostenkowski, leader of the Democratic delegation from Illinois, have also urged the Postmaster General to issue the commemorative stamp; and

Sidney Yates	Samuel H. Young
Melvin Price	Philip M. Crane
Frank Annunzio	Edward Madigan

and

The Museum of Contemporary Art (Chicago)

The Lawyers Shrine Club

The Decalogue Society of Lawyers

The Anti-Defamation League;

and

WHEREAS, The City Council of the City of Chicago has been informed that the Postmaster General has as yet failed to direct the issuance of the commemorative stamp requested; and

WHEREAS, The City Council of the City of Chicago has been advised that since November 4, 1971, when the Postmaster General was first requested by the Senate of the State of Illinois to take action on the issuance of this commemorative stamp, 62 commemoratives have been issued; and

WHEREAS, The Chicago stamp requested, by its very nature and patriotic message to the nation and the world, merits the affirmative action given by the Postmaster General to those commemoratives that have been issued subsequent to the request made on November 4, 1971; now, therefore

Be It Resolved, That the City Council of the City of Chicago, in regular meeting assembled, firmly believes and reiterates that a commemorative postage stamp honoring George Washington, Robert Morris and Haym Salomon should be issued without further delay and that the City Council of the City of Chicago respectfully requests that it be advised when such action will be taken; and

All the Aldermen praised "Ray" highly for his integrity, objectivity and impartiality. The passing of Chicago Today was admitted to be a great loss, but it was noted that Ray's loss would be an even greater one for the Press room. He was characterized as a "champion" in the "big league" and a newspaper man's "newspaper man". It was also noted that he had always been eminently fair in his writings, and had faithfully checked all sources before writing a story. All wished him well and hoped that his talent would find greater fields of expression.

Alderman Bilandic asked that the privilege of addressing the Council be extended to Jay McMullen, on behalf of the members of the press corps.

Mr. McMullen addressed the Council stating that all would miss Ray and wished him well in his future endeavors.

Honorable Richard J. Daley, Mayor, then spoke, saying that Ray should write a book on how to succeed with politicians. He praised him for the high caliber of his work and invited him to address the Council.

Mr. McCarthy stated that the day he had received his "pink slip" had seemed like the end of the world but that today had made it all worthwhile. He stated that he had made a pledge to himself to always try

to be fair and hoped that he had succeeded. He also expressed his pleasure at the many kind words and that all had made his work easier. He thanked all the department heads and all city employees who had given him assistance. He concluded by saying that if one read that the Council was a "rubber stamp" it was said in envy, because of its great leadership. He also pointed out that today was Ed Schreiber's thirty-fifth wedding anniversary. He departed amidst a standing ovation.

Carol Fox Congratulated for Twenty Years of Service with Lyric Opera.

Honorable Richard J. Daley, Mayor, on behalf of himself and the other members of the City Council submitted the following proposed resolution:

In twenty years of phenomenal growth, it has become a firmly established institution in our City and played a major role in the re-emergence of Chicago as an important cultural center. In its first year the Lyric Opera offered sixteen performances. Its marvelous growth is attested to by the fact that this year it will require fifty-two performances to satisfy the outpouring of support and involvement for first rate opera in Chicago; and

WHEREAS, Miss Fox has continuously sought out and brought to Chicago the most outstanding talent and has show-cased them in outstanding productions, supported them with excellent casts and has provided a program variety unknown elsewhere in the operatic world; and

WHEREAS, This twentieth anniversary year is also the occasion for Lyric Opera to host the Fourth International Verdi Congress, which is a gathering of scholars, musicians, critics and producers of Opera from all sections of the world. The choice of Chicago as host to the Congress' first United States meeting is a tribute to Miss Fox and a recognition of her tireless devotion to the expansion of musical appreciation generally, and opera specifically; now, therefore,

Be It Resolved, That the Mayor and members of the City Council of the City of Chicago in meeting assembled, this 19th day of September, A.D. 1974, do hereby express our congratulations to Miss Carol Fox and to the Lyric Opera of Chicago upon the achievement of twenty years of service to the City and, further, express our gratitude, good wishes and support for many years of continued service together; and

This Sublease made as of March 1, 1973, by and between Northwest Airlines, Inc. (hereinafter referred to as "Northwest") and Southern Airways, Inc. (hereinafter referred to as "Southern").

WITNESSETH:

Whereas, under date of May 14, 1969, the City of Chicago (hereinafter referred to as the "City") entered into an Agreement (hereinafter referred to as the "Agreement") with Northwest for the lease from the City to Northwest of certain premises at Chicago Midway Airport, and more specifically described therein; and

Whereas, Northwest and Southern now desire to enter into a sublease of a portion of said premises;

Now, Therefore, in consideration of the premises and mutual covenants and agreements herein contained, the parties hereto mutually agree as follows:

1. Subject to obtaining approval of this Sublease from the City Council of the City of Chicago, Northwest hereby leases to Southern certain space as shown on the attached exhibit for use and occupancy by Southern, solely for air cargo offices and purposes incidental thereto; and in addition to the aforesaid space, Southern is hereby granted the right to use jointly with Northwest the restrooms near the leased premises.

2. The term of this Sublease, unless sooner terminated as herein provided, shall be for a period commencing on March 1, 1973, and terminating on February 28, 1976.

3. As rental for said space and uses, Southern agrees to pay Northwest during the term hereof the sum of $425.00, monthly in advance, this rental including normal lighting, heating and water.

4. This Sublease shall be subject to, and said use and occupancy shall be in compliance with, all covenants, conditions and obligations imposed by the Agreement aforementioned, as heretofore or hereafter amended, and all rules and regulations promulgated pursuant thereto.

5. Southern hereby agrees to indemnify and hold the City and Northwest harmless from and against any and all liabilities, judgments, costs, damages and expenses which may accrue against, be charged to, or recovered from the City or Northwest by reason or on account of damage to the property of the City or Northwest, or the property of, injury to, or death of any person arising from Southern's use and occupancy of said space including acts of its agents, contractors and subcontractors except when caused by the sole negligence of Northwest, its agents, contractors and subcontractors. Southern further agrees to furnish the City and Northwest with evidence of insurance of the type and in the amounts as may be requested by the City and Northwest.

6. Southern shall procure (and maintain in effect throughout the term of lease) in any reasonable limits of coverage that may be requested by Northwest or the City, Comprehensive Public Liability Insurance and, upon notice from Northwest or the City, any other type of insurance that may from time to time be reasonable and usual as related to the use and occupancy of the leased premises, which policies shall be with an insurer or insurers satisfactory to Northwest and the City, and naming, where appropriate, Northwest as an additional assured thereunder. 7. Northwest reserves to itself and the City the right to enter the premises, temporarily discontinue utilities or services, and temporarily interrupt or interfere with access to the premises for the purpose of inspection, remedying any defaults, or for the purpose of making repairs, replacements, alterations, or improvements in or about the premises or any other areas on the Airport, when desirable in the opinion of Northwest or the City. Neither the City nor Northwest shall in any way be liable for any interruptions or interferences as aforesaid. Northwest also reserves the right to itself and City to retain, install and maintain lines, wires, piping, valves, meters, ducts and antenna, as may be necessary or desirable to Northwest and/or the City.

8. Southern shall keep and maintain the exclusively leased space in good condition and repair, and, unless otherwise agreed upon, shall obtain at its sole cost and expense usual janitorial services to maintain said space in a clean, neat, orderly and presentable condition.

9. Southern takes the premises "as is" and agrees that no alterations or improvements are herein to be required of Northwest. Southern may, however, at its sole cost and expense make alterations or improvements to the premises subject to the prior written consent of Northwest and the Commissioner of Aviation of the City of Chicago.

10. Southern shall not assign or sublease the premises or permit same to be used by others without the prior written approval of the City Council of the City of Chicago and Northwest.

12. This sublease shall be terminated prior to expiration under any of the following circumstances:

a) At the option of either party upon sixty (60) days written notice to the other.

b) Immediately upon refusal of the City Council of the City of Chicago to authorize approval of this Sublease.

c) Immediately upon the termination of the Agreement between Northwest and the City as to the premises leased herein for any reason whatsover, notwithstanding the fact that the said Agreement may continue as to other premises or uses.

d) If the premises are rendered untenantable by casualty or other means and Northwest and/or City does not intend to repair or rebuild.

In the event of termination, or expiration, as herein provided, Southern agrees to surrender the premises in good order and condition, reasonable wear and tear excepted, and at Northwest's option restore the premises as nearly as possible to its original condition and layout. In the event of termination as aforestated, rent shall be due and prorated to date of termination and upon surrender in accordance herewith, neither party shall be further liable to the other.

13. Southern agrees that in performing under this agreement it shall not discriminate against any worker, employee or applicant, or any member of the public, because of race, creed, color, religion, age, sex, or national origin, nor otherwise commit an unfair employment practice. Southern will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, creed, color, religion, age, sex, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Southern agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this non-discrimination clause. ARTICLE I

Grant of Rights

Airline shall have the right and privilege to operate at the Airport an air transportation system, which right and privilege shall, subject to rules and regulations promulgated by City in accordance with Article VIII hereof and to the payment of fees and charges hereinafter provided, include the use, in common with others authorized by City so to use, of the following areas and facilities now or hereafter provided at or adjacent to the Airport and available for common use:

(a) landing and take-off areas (including runways and landing strips) for aircraft;

(b) taxiway areas for aircraft;

(c) passenger and cargo ramp areas and facilities;

(d) aircraft parking areas and facilities;

(e) facilities for the purpose of controlling or assisting landings, take-offs and other movement of aircraft using the Airport, including, without limitation, control towers, floodlights, landing

lights, beacons, signals, radio aids and all other conveniences and aids to operation, navigation or ground control of aircraft.

Such use by Airline includes the exercise of any and all of the following rights, subject to rules and regulations promulgated by City in accordance with Article VIII hereof:

(a) the right to land, take-off, fly and move aircraft operated by Airline;

(b) the right on the passenger and cargo ramp areas as designated from time to time by City as available for common use, to load and unload persons, property, cargo and mail upon or from aircraft operated by it or by any other scheduled air transportation company, by such means as may be reasonably necessary or convenient; provided, however, that Airline may not load or unload exclusive freight or cargo flights on the passenger ramp areas adjacent to the passenger terminal facilities at the Airport, and City agrees that it will not permit any other aircraft operator to load or unload exclusive cargo or freight flights on such passenger ramp areas;

(c) the right on the passenger and cargo ramp areas designated from time to time by City as available for common use, to service aircraft and other equipment operated by Airline or by any other scheduled air transportation company, with gasoline, oil, greases, lubricants and other fuel or propellant, and with foods and beverages and other supplies and materials, by such means as may be reasonably necessary or proper;

(d) the right on the passenger and cargo ramp areas designated from time to time by City as available for common use, to repair, condition, maintain, test and park aircraft and other equipment operated by Airline or by any other scheduled air transportation company; provided, however, such repair, conditioning, maintenance and testing shall be limited to those activities at the time commonly considered routine ramp servicing (which term shall include the activities referred to in subparagraph (c) above); and provided further, parking of aircraft on such areas may be limited as provided in Article III hereof;

(e) the right to park aircraft on aircraft parking areas designated from time to time by City as available for common use; provided, however, parking of aircraft on such areas may be limited, as provided in Article III hereof;

(h) the right to operate and maintain such mobile communications equipment as may be reasonably necessary or convenient for its operations; provided, the exercise of such right does not interfere with the City's operation of the Airport for the benefit of all aircraft using the Airport;

(i) the right to purchase or otherwise obtain and use personal property of any nature (including aircraft, engines, accessories, gasoline, oil, greases, lubricants, other fuel or propellant, food, beverages, other equipment and supplies and any articles or goods) reasonably necessary or convenient for its operations from any supplier of its choice; and

(j) the right to conduct operations or activities other than those enumerated in subparagraphs (a) to (i), inclusive, of this paragraph, reasonably related to the landing, take-off, flying, move-

ment, loading, unloading or ramp servicing of aircraft, which are reasonably necessary or convenient to the conduct by it of air transportation; provided, however, that all such operations and activities shall be subject to the approval of the Commissioner of Aviation, provided further, the exercise of such right does not interfere with City's operation of the Airport for the benefit of all aircraft using the Airport.

Provided, however, that the rights conferred under this Article I shall not be construed to authorize the conduct by Airline of any business separate from its operation of an air transportation system; and further provided, that the rights conferred under this Article I may be exercised by Airline alone or in conjunction with any other Airline Parties, directly or through another designated by it or them, excepting that the rights conferred by subparagraph (c) above to service aircraft and other equipment with gasoline, oil, greases, lubricants and other fuel or propellant may be exercised by Airline in conjunction with any other Airline Parties, either directly or through another designated by them, only with respect to aircraft and other equipment operated by Airline Parties.

Airline shall have the right and privilege to install and maintain and operate at such location on the Airport as may be approved by the Commissioner of Aviation, communication, meteorological and aerial navigation equipment and facilities as may be reasonably necessary or convenient to the conduct by it of air transportation, provided the exercise of such right and privilege does not interfere with City's operation of Airport for the benefit of all aircraft using the Airport.

Subject to rules and regulations promulgated by City in accordance with Article VIII hereof, Airline shall have the right and privilege over the Airport of ingress to and egress from (but not any other use of, except as authorized in this Agreement or in any other agreement between City and Airline) the areas and facilities described in this Article I for its employees, agents, passengers, guests, patrons and invitees, its or their suppliers of materials and furnishers of service, its or their equipment, vehicles, machinery and other property and except as in this Agreement or in any other agreement between City and Airline otherwise specifically provided, no charges, fees or tolls of any nature, direct or indirect, shall be imposed by City upon Airline, its employees, agents, passengers, guests, patrons and invitees, its or their suppliers of materials and furnishers of service for such right of ingress and egress, or for the privilege of purchasing, selling or using any materials or services purchased or otherwise obtained by Airline, as provided in subparagraphs (g) and (i) of this Section, or transporting, loading, unloading or handling persons, property, cargo or mail in connection with Airline's business or exercising any right or privilege granted by City hereunder. The foregoing shall not preclude City or its concessionaires from making and collecting a charge for the use of public automobile parking areas, sightseeing facilities or ground transportation to and from the Airport or preclude City from imposing any tax or permit or license fee not inconsistent with the rights and privileges granted to Airline hereunder.

This grant is not to be construed as a lease of any space in any passenger terminal building, any adjacent ramp area leased by City to any air transportation company or other person, firm or corporation, any hangar, any air cargo building, any fueling system or any other building constructed or to be constructed by City at the Airport. Any ramp area at the Airport leased by City to one or more air transportation companies, persons, firms or corporations shall not be considered to be a public ramp area or a ramp area available for common use.

ARTICLE II

Flight Fees for Landing of Aircraft

Section 2.01. *Flight Fees for landing of aircraft.* In connection with each fee landing at the Airport of each aircraft operated by it, Airline shall pay to City a fee (hereinafter called "Flight Fee") determined as hereinafter provided.

Each separate landing at the Airport of an aircraft (whether in connection with a revenue or a non-revenue flight) operated by Airline or others, shall be a "fee landing", except that a "fee landing" shall not include the following:

(a) any landing at the Airport of an aircraft which shall have taken off from the Airport and, without making a stop at any other airport, returns to and lands at the Airport because of meteorological conditions, mechanical or operating causes, or any similar emergency or precautionary reason;

(b) any landing at the Airport of an aircraft returning to the Airport on a non-revenue flight from the Chicago Municipal Airport, known as Midway Airport, provided each such aircraft shall have taken off from the Airport on a non-revenue flight to Midway Airport without in either case making a stop at any other airport;

(c) any touch-and-go and similar operation in which an aircraft comes in contact with a runway at the Airport and without coming to a stop thereafter resumes flight by leaving the ground from the same runway and in the same direction;

(d) any landing of aircraft operated by the United States Government or the Illinois National Guard if and to the extent the lease entered into between City and the United States Government, dated May 16, 1958, relating to the Airport shall remain in effect and under the terms and conditions thereof, such landing is to be without charge, or if and to the extent that under the terms and conditions of assurances pursuant to the Federal Airport Act, or any other prior or future Acts of Congress or of the General Assembly of the State of Illinois that may provide for Grants in Aid of airport development, such landing is to be without charge; or

(e) any landing at the Airport of helicopter aircraft operated in local service between the Airport and any point within a radius of fifty (50) miles from the Airport.

SECTION 2.02. *Flight Fee rate after December 31, 1958 and while any Approved Revenue Bonds are outstanding.* During the fiscal year commencing January 1, 1959 and during each fiscal year thereafter, but only so long as any Approved Revenue Bonds are outstanding, the Flight Fee payable in connection with each fee landing at the Airport of an aircraft operated by Airline shall be such amount (computed to the nearest 1/10th of a cent) per each one thousand pounds (1,000 lbs.) of the approved maximum landing weight of such aircraft as equals the quotient obtained by dividing (a) the Flight Fee Revenue Requirements for the fiscal year in which such fee landing occurs by (b) the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport during such year, both as estimated by the Airport Consultant. So long as any Approved Revenue Bonds are outstanding, the Airport Consultant shall, prior to January 1 and July 1 of each year, commencing January 1, 1959, furnish an estimate of Flight Fee Revenue Requirements for such year and of the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties to be landed in fee landings at the Airport during such year and during the six-month periods commencing such January 1 or July 1, respectively, and shall recommend, based on such estimate, the Flight Fee rate for fee landings at the Airport during each such six-month period of aircraft operated by Airline Parties. The Airport Consultant in making any estimate of Flight Fee Revenue Requirements for any fiscal year at any time after the Budget, referred to in the Revenue Bond Ordinance, for such fiscal year shall have been adopted, shall use budgeted amounts wherever applicable, and insofar as such estimate involves any deferred income properly allocable to such year on account of the results of the next preceding fiscal year, any such estimate made after the filing of the audited statement, referred to in Section 6.08 of the Revenue Bond Ordinance, for such next preceding year shall take into account the amount shown as such deferred income in such audited statement. The Flight Fee rate for such fee landings shall be established (including, if required, any revision thereof as of July 1 of any year) according to such recommendation of the Airport Consultant.

Notwithstanding the foregoing provisions of this Section 2.02, in the event the effective date of this Agreement shall be subsequent to January 1, 1959, then the Flight Fee rate in effect immediately prior thereto shall continue in effect until a revised rate is established in accordance with the provisions of this Section 2.02. Promptly after such effective date, the Airport Consultant shall recommend whether or not a revised Flight Fee rate should be established for fee landings at the Airport for the period commencing as early as practicable following such effective date and ending on the next succeeding June 30 or December

31, as the case may be, and if such a revised rate is recommended, the date on which it should be placed in effect. Such recommendation shall be based on an estimate of the same character as that referred to in the preceding paragraph, which estimate, however, shall take into account the estimated expenses, and the estimated Revenues to be produced from the Flight Fee rate in effect during the period prior to the date on which any revised Flight Fee rate is recommended to be placed in effect. A Flight Fee rate shall be established in accordance with any such recommendation of the Airport Consultant.

SECTION 2.03. *Deficiency in Flight Fees while any Approved Revenue Bonds are outstanding.* In the event that in any fiscal year, beginning with the fiscal year commencing January 1, 1959, in which any Approved Revenue Bonds are outstanding, the Revenues under the Revenue Bond Ordinance for such fiscal year (excluding, however, any Flight Fee deficiency for such fiscal year) shall be less than the amount of Airport Expense for such fiscal year (such deficiency being herein referred to as the "Flight Fee deficiency"), then Airline shall pay to City the Airline's pro rata share of the Flight Fee deficiency for such year. Airline's pro rata share of a Flight Fee deficiency for any fiscal year shall be such amount as bears the same proportion to the amount of such deficiency as the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by Airline and landed in fee landings at the Airport during such year bears to the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport during such year. The City Comptroller shall, promptly, but not later than January 15, after the end of each such fiscal year, furnish to Airline an estimate of the Revenues under the Revenue Bond Ordinance and Airport Expense for such year, including an estimate as to whether or not any Flight Fee deficiency exists for such year, and Airline shall pay its pro rata share of any Flight Fee deficiency for such year shown by such estimate. In the event the Flight Fee deficiency for any fiscal year shown in the audited statement, referred to in Section 6.08 of the Revenue Bond Ordinance, for such year, shall exceed the Flight Fee deficiency for such year shown in the above-mentioned estimate of the City Comptroller for such year, then Airline shall pay its pro rata share of such excess, and in the event such audited statement for any fiscal year shall show a Flight Fee deficiency for such year, but no Flight Fee deficiency for such year shall have been shown in the above-mentioned estimate of the City Comptroller for such year, then Airline shall pay its pro rata share of the Flight Fee deficiency shown in such audited statement.

SECTION 2.04. *Flight Fee rate after effective date of Agreement and when no Approved Revenue Bonds are outstanding.* At any time after the effective date of this Agreement when no Approved Revenue Bonds are outstanding, the Flight Fee payable in connection with each fee landing at the Airport of an aircraft operated by Airline during each twelve-month period (or portion thereof during which no Approved Revenue Bonds are outstanding) commencing July 1 shall be such amount (computed to the nearest 1/10th of a cent) per each one thousand pounds (1,000 lbs.) of the approved maximum landing weight of such aircraft, as equals the quotient obtained by dividing (a) the Adjusted Net Airport Expense for the fiscal year next preceding the commencement of such twelve-month period by (b) the number of thousands of pounds of the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport during such preceding fiscal year.

SECTION 2.05. *Minimum Flight Fee.* Notwithstanding the foregoing provisions, the Flight Fee payable in connection with each fee landing at the Airport of an aircraft operated by Airline shall at no time be less than a minimum of Six Cents ($0.06) per each one thousand pounds (1,000 lbs.) of the approved maximum landing weight of such aircraft.

SECTION 2.06. *Definitions.* Article XV hereof defines various terms used in this Article II.

ARTICLE III

AIRCRAFT PARKING FEES

In the event Airline shall park its passenger aircraft in any public passenger ramp area at the Airport for a period of more than forty-five (45) minutes, then at the discretion of City, removal of such aircraft may be directed by it and if upon the lapse of a fifteen (15) minute period after such direction, Airline shall fail to so remove its aircraft, it shall pay to City a fee of Five Dollars ($5.00) for each

thirty (30) minutes or fraction thereof that such aircraft remains in such public passenger ramp area after such fifteen (15) minute period. In the event Airline shall park its cargo aircraft in any public cargo ramp area for a period of one hundred twenty (120) minutes, then at the discretion of City, removal of such aircraft may be directed by it and if upon the lapse of a fifteen (15) minute period after such direction, Airline shall fail to so remove such aircraft, it shall pay City a fee of Five Dollars ($5.00) for each thirty (30) minutes or fraction thereof that such aircraft remains in such public cargo ramp area after such fifteen (15) minute period.

City may charge Airline fees of not more than Ten Dollars ($10.00) for each twenty-four (24) hours or fraction thereof in excess of a free period of twenty-four (24) hours for the parking of its aircraft in public aircraft parking areas.

ARTICLE IV

Payment of Fees

City shall, within fifteen (15) days following the end of each calendar month, furnish to Airline a statement setting forth the amount of any Flight Fees and Aircraft Parking Fees payable by Airline hereunder for such month. The amount of any Flight Fees and Aircraft Parking Fees payable by Airline hereunder for any calendar month shall be due and payable by it on the last day of the next succeeding calendar month.

City shall, as promptly as practicable, furnish to Airline a statement setting forth any amount payable by Airline pursuant to Section 2.03 hereof as Airline's pro rata share of any Flight Fee deficiency and such amount payable by Airline shall be due and payable by it within twenty (20) days after such statement is mailed or otherwise delivered by City.

All amounts payable by Airline hereunder shall be paid to City at the office of the City Comptroller of City and any amount payable by Airline hereunder which is not paid when due shall bear interest at the rate of seven per cent (7%) per annum from the due date thereof until paid.

The payment by Airline to City of any amount thereunder and the acceptance thereof by City, shall not preclude either Airline or City from questioning, within a period of eighteen (18) months from the date of such payment by Airline, the accuracy of any statement on the basis of which such payment was made, or preclude City from making, within such period, any claim against Airline for any additional amount payable by Airline hereunder, or preclude Airline from making, within such period, any claim against City for credit for any excess amount paid by Airline hereunder.

Under the Lease of Terminal Facilities contemporaneously entered into between City and Airline, City has leased to Airline certain passenger ramp areas at the Airport and Airline has agreed to pay certain rentals therefor. It is recognized that rental payable by Airline to City for such areas is the equivalent of a commitment of payment by Airline of a minimum amount of Flight Fees under this Agreement, as provided in Section 4.02 of such Lease of Terminal Facilities. Accordingly, notwithstanding any other provision of this Agreement, any amount payable by Airline to City, pursuant to Section 4.02 of such Lease of Terminal Facilities, as rental for any calendar month for passenger ramp areas at the Airport leased to Airline shall be applied against the amount of Flight Fees otherwise payable by Airline to City hereunder for fee landings at the Airport of aircraft operated by Airline during the same calendar month or during any subsequent calendar month in the same fiscal year, and any amount of such rental so applied shall, to the extent so applied, be deemed the payment by Airline to City of a like amount of Flight Fees hereunder.

At the end of each fiscal year, and prior to the computation of any Flight Fee deficiency for such fiscal year as provided by Section 2.03 hereof, to the extent that the sum of

(a) Flight Fees payable by Airline for fee landings at the Airport during such fiscal year against which rentals for such passenger ramp areas have not been applied, and

(b) Rentals payable by Airline for such fiscal year for such passenger ramp areas,

exceed the higher of total Flight Fees payable by Airline for fee landings at the Airport during such fiscal year, or the total rentals payable by Airline for such fiscal year for such passenger ramp areas, then the excess shall be available to Airline for application by it against any amount payable by Airline to City under this Agreement during the following fiscal year.

ARTICLE V

Term of Agreement

Section 5.01. *Term.* The term of this Agreement shall be for a period of forty (40) years commencing on the date set forth in the first line of this Agreement.

Section 5.02. *Covenant to use Airport.* Airline covenants and agrees with City that subject to such orders, rules and regulations as may be promulgated from time to time by the Federal Government or any agency thereof, it will during each fiscal year any Approved Revenue Bonds are outstanding, use the Airport and provide for fee landings of its aircraft at the Airport; provided, however, that if Airline does not now have terminal building space at the Airport, the above covenant shall be applicable to Airline from and after such time as adequate terminal building space (or adequate cargo building space, if Airline is not certificated as a scheduled passenger carrier) is made available to it at the Airport.

ARTICLE VI

Construction, Maintenance and Repair by Airline

Section 6.01. *Construction, maintenance and repair by Airline.* Airline may either alone, or jointly with any one or more other Airline Parties, construct or install such communication, meteorological and aerial navigation equipment as may be reasonably necessary or convenient to the conduct by Airline of air transportation, and such conduits, pits, covered trenches, ducts and other facilities, as may be reasonably necessary or convenient for power, light and communication purposes or for use in connection with the handling and servicing of aircraft, all as may be approved by the Commissioner of Aviation.

All such construction or installation by Airline shall be made in accordance with applicable laws and ordinances and after obtaining any requisite building or construction licenses or permits. Plans and specifications of any such proposed construction or installation (including any substantial alteration or addition thereto) shall be submitted to and receive the approval of the Commissioner of Public Works prior to the commencement of construction or installation. Any structures, facilities and additions so constructed or installed by Airline shall be kept and maintained by it in good condition and repair. No restrictions, however, shall be placed upon Airline as to the architects, builders or contractors who may be employed by it in connection with any construction, installation, alteration, repair or maintenance of any such structures, facilities or additions.

Section 6.02. *Performance by City upon failure of Airline to maintain.* In the event Airline fails to perform for a period of thirty (30) days after notice from City so to do, any obligation required by this Article VI to be performed by Airline, City may do all things necessary to perform such obligation, charging the cost and expense thereof to Airline, and Airline agrees to pay City all such costs and expenses in addition to any other amounts payable by Airline hereunder; provided, however, that if Airline's failure to perform any such obligation endangers the safety of the public or of employees of City, and City so states in its notice to Airline, City may perform such obligation of Airline at any time after giving of such notice and charge to Airline, and Airline shall pay, as aforesaid, the cost and expense of said performance.

ARTICLE VII

Maintenance and Operation by City

Section 7.01. *Maintenance and operation of Airport.* City shall operate, maintain and keep in good repair the areas and facilities described in Article I hereof, excepting any structures or facilities

constructed or installed by Airline pursuant to Article VI hereof. City shall keep the Airport free from obstruction, including the removal of snow, vegetation, stones and other foreign matter, as reasonably as may be done, from landing, take-off, public ramp, and public parking areas.

City shall operate and maintain the Airport in all respects in a manner consistent with that of a reasonably prudent operator of an airport and in accordance with standards and ratings for airports of similar size and character issued by the Civil Aeronautics Administration and with the rules and regulations of the Civil Aeronautics Administration and any other governmental agency having jurisdiction thereof. City shall operate the Airport in a manner so as to produce, subject to the provisions of this Agreement, revenues from the Airport of a nature and amount which would be produced by a reasonably prudent operator of an airport.

In the event any operator selected by City for the purpose of providing transportation service to and from the Airport of passengers and their baggage shall not furnish such transportation in a satisfactory and efficient manner, City shall, upon request of the Airlines Representative, use its best efforts to correct such situation, including, if required, the selection of another operator if City has authority to do so under the terms of the applicable concession agreement, to the end that such transportation service is performed in a satisfactory and efficient manner.

City shall supply adequate lighting for the Airport, including adequate landing lights, floodlights, beacons and other field lighting.

City shall use its best efforts to keep the Airport open and in operation for landings and take-offs of aircraft of any type using facilities similar to those at the Airport.

City shall maintain order at the Airport.

SECTION 7.02. *Enjoyment of Rights and Privileges.* City agrees that Airline, performing its obligations hereunder, shall be entitled to and shall have the enjoyment of the rights and privileges granted to it hereunder, subject to the provisions hereof.

SECTION 7.03. *Performance by Airline upon failure of City to maintain and operate.* In the event City fails to perform, for a period of thirty (30) days after notice from Airline so to do, any obligation required by this Article VII to be performed by City, Airline may perform, by itself or jointly with any other Airline Parties, such obligation of City and bill City for the cost to Airline of such performance, but Airline shall not deduct any such cost from any amounts due hereunder or under any other agreement between Airline and City relating to the Airport unless at the time there are no Approved Revenue Bonds outstanding; provided, however, that if City's failure to perform any such obligation endangers the safety of Airline's operation at the Airport and Airline so states in its notice to City, Airline may perform, by itself or jointly with any other Airline Parties, such obligation of City at any time after the giving of such notice and bill City for its cost of such performance, but Airline shall not deduct any such cost from any amounts due hereunder or under any other agreement between Airline and City relating to the Airport unless at the time there are no Approved Revenue Bonds outstanding. City, however, shall not be liable to Airline for any loss of revenues to Airline resulting from any of City's acts, omissions or neglect in the maintenance and operation or otherwise by it of the Airport or any facilities now or hereafter connected therewith.

ARTICLE VIII

RULES AND REGULATIONS

Airline shall observe and obey all rules and regulations governing the conduct and operation of the Airport, promulgated from time to time by City, which are reasonably required for the prudent and efficient operation of the Airport and are not inconsistent with the reasonable exercise by Airline of any right or privilege granted to it hereunder or under any other agreement between Airline and City relating to the Airport or any part thereof, nor inconsistent with safety nor with the rules and regulations of any Federal or State agency having jurisdiction with respect thereto, nor inconsistent with

the procedures prescribed or approved from time to time by the Civil Aeronautics Administration or any other governmental authority having jurisdiction over flight operations at the Airport.

City shall keep Airline supplied with five (5) sets of City's current Airport rules and regulations applicable to Airline. Except in cases of emergency, no such rule or regulation shall be applicable to Airline unless it has been given fifteen (15) days notice of the adoption thereof.

City, however, shall have no control over the rates, fares or charges that Airline may prescribe in connection with its conduct of an air transportation business.

ARTICLE IX

Exercise by City of Governmental Functions

Nothing contained herein shall impair the right of City in the exercise of its governmental functions to require Airline to pay any tax or inspection fees or to procure necessary permits or licenses, provided such requirement is not inconsistent with the rights and privileges granted to Airline hereunder.

Nothing contained herein shall be deemed to be the grant of any franchise, license, permit or consent to Airline to operate motor coaches, buses, taxicabs or other vehicles carrying passengers or property for hire or other consideration over the public ways to and from the Airport.

ARTICLE X

Indemnity and Insurance

Airline agrees to indemnify and hold City harmless from and against all liabilities, judgments, costs, damages and expenses which may accrue against, be charged to or recovered from City by reason or on account of damage to the property of City or the property of, injury to or death of any person, arising from Airline's use and occupancy of and operations at the Airport, including acts of its agents, contractors and subcontractors, except when caused by City's sole negligence or by the joint negligence of City and any person other than Airline, its agents, contractors and subcontractors; provided that City shall give Airline prompt and timely notice of any claim made or suit instituted which, in any way, affects Airline or its insurer, and Airline or its insurer shall have the right to compromise and defend the same to the extent of their own interests. Any final judgment rendered against City for any cause for which Airline is liable hereunder shall be conclusive against Airline as to liability and amount.

Airline shall, at its own expense, keep in force insurance of the following types and in not less than the following amounts, issued by a company or companies of sound and adequate financial responsibility, insuring Airline and City against all liabilities for accidents arising out of or in connection with Airline's use and occupancy of and operations at the Airport, except when caused by City's negligence alone or jointly with any person other than Airline, its agents, contractors and subcontractors, and shall furnish to City certificates evidencing such insurance, naming City as an additional assured thereunder, subject to the limitations set forth above in respect of City's negligence, to-wit:

Aircraft Public Liability Insurance	$ 100,000	per person
	$1,000,000	per accident
Aircraft Property Damage Insurance	$ 200,000	per accident
Comprehensive Public Liability Insurance	$ 100,000	per person
	$ 250,000	per accident
Comprehensive Property Damage Insurance	$ 100,000	per accident

If pursuant to any other agreement between Airline and City, Airline is complying with requirements identical with those of this Section, such compliance shall also serve as compliance with the requirements of this Section.

ARTICLE XI

Books, Records and Reports

City shall follow such procedures and keep and maintain such books, records and accounts as may be necessary or appropriate, in accordance with generally accepted sound accounting practices and principles, for the purpose of determining all capital expenditures, expenses and revenues properly allocable to the Airport for each fiscal year. All items affecting the computation of the Flight Fee or any Flight Fee deficiency payable by Airline for any period, and the aggregate approved maximum landing weight of all aircraft operated by all Airline Parties and landed in fee landings at the Airport, shall be recorded and reflected by City, in accordance with generally accepted sound accounting practices and principles, in such books, records and acounts.

City shall furnish to Airline, within four (4) months after the close of each fiscal year, beginning with the year 1958, a copy of an annual audit report, prepared in accordance with generally accepted sound accounting practices and principles and certified by a firm of independent certified public accountants of recognized standing, covering the operation by City of the Airport for such year. Such annual audit report shall contain, among other things, a statement of the aggregate approved maximum landing weight of all aircraft operated by each Airline Party, shown separately by name and by all Airline Parties in the aggregate, which were landed in fee landings at the Airport during such year; it shall also disclose the amount of the Flight Fee deficiency (if any) payable by each Airline Party and the basis of computation thereof; also, in respect of any year in which no Approved Revenue Bonds are outstanding, it shall contain a separate statement of the items affecting computation of the Flight Fee.

City shall advise the Airlines Representative, as early as practicable, of any capital expenditures (other than those included in the plans and specifications on file in the office of the City Clerk and approved by the Revenue Bond Ordinance) proposed to be made by City at or adjacent to the Airport, which involve an estimated cost to City of more than Fifty Thousand Dollars ($50,000). City shall furnish to such Representative, and any persons designated by him, all relevant information concerning such proposed capital expenditures, and City shall give due consideration to any suggestions made by such Representative, or any persons designated by him, with respect to such proposed capital expenditures and the cost, character and desirability thereof.

At least twenty (20) days before any concession arrangement is entered into between City and any concessionaire with respect to the use of any space or facilities at the Airport, City shall advise the Airlines Representative of the proposed concession arrangement and furnish to such Representative, and any persons designated by him, all relevant information concerning such proposed concession arrangement. The Commissioner of Aviation shall give due consideration to any suggestions made by such Representative, or any persons designated by him, with respect to such proposed concession arrangement.

City agrees that it will not, during the term of this Agreement, either lease or otherwise permit the use of any space, area or facility in any terminal building or otherwise upon the Airport, by way of a concession or otherwise, to any individual, partnership or corporation engaged in business as a travel agent or travel bureau for the purpose of selling, furnishing or delivering tickets available from any Airline Party for transportation by air.

City shall, prior to any appointment by it after the date hereof of an Airport Consultant or Consulting Engineer, consult with the Airlines Representative concerning such appointment and will give due consideration to any suggestions made by such Representative concerning such appointment.

Airline shall maintain at its office in Chicago, Illinois or at the Airport, books, records and accounts in connection with or having a bearing upon the determination of any Flight Fee payable by it, or if such books, records and accounts are not maintained at such office, it shall promptly furnish the Commissioner of Aviation and the City Comptroller with all information reasonably requested by them with respect to such books, records and accounts. The Commissioner of Aviation and the City Comptroller, and such persons as may be designated by them, shall have the right, at all reasonable times, to examine, make

copies of, and take extracts from such books, records and accounts. The Airlines Representative, and such persons as may be designated by him, shall have the right, at all reasonable times, to examine, make copies of, and take extracts from, the books, records and accounts of City in connection with or having any bearing upon the determination of any Flight Fee payable by Airline Parties or any Flight Fee deficiency payable by any of them pursuant to Section 2.03 hereof.

ARTICLE XII

Termination by City

City may terminate this Agreement by giving Airline sixty (60) days advance notice upon or after the happening and during the continuance of any one of the following events:

(a) The filing by Airline of a voluntary petition in bankruptcy. In such event, City shall have the right to file a claim as a creditor and the amounts due and to become due, under the terms of this Agreement, shall be accelerated and become due and payable.

(b) The institution of proceedings in bankruptcy against Airline and the final adjudication of Airline as a bankrupt pursuant to such proceedings.

(c) The taking by a court of competent jurisdiction for a period of sixty (60) days of all or substantially all of Airline's assets pursuant to proceedings brought under the provisions of any Federal reorganization act.

(d) The appointment of a receiver of all or substantially all of Airline's assets and Airline's failure to vacate such appointment within sixty (60) days thereafter.

(e) The assignment by Airline of its assets for the benefit of its creditors.

(f) The abandonment by Airline of its conduct of air transportation at the Airport.

(g) The default by Airline in the performance of any covenant or agreement required to be performed by Airline herein and the failure of Airline to remedy such default, or to take prompt action to remedy such default, within a period of sixty (60) days after receipt from City of notice to remedy the same.

No waiver of City of default of any of the terms, covenants or conditions hereof to be performed, kept and observed by Airline shall be construed to be or act as a waiver of any subsequent default of any of such terms, covenants and conditions.

ARTICLE XIII

Termination by Airline

After but only after the payment and retirement of all Approved Revenue Bonds, Airline may terminate this Agreement and any or all of its obligations hereunder at any time that Airline is not in default in the payment of any amount due from it to City hereunder by giving City sixty (60) days advance notice upon or after the happening and during the continuance of any one of the following events:

(a) The failure or refusal of the Civil Aeronautics Administration to approve all weather operations into and from the Airport of aircraft of any type operated by Airline in scheduled air transportation using facilities similar to those at the Airport and continuance thereof for a period of at least sixty (60) days.

(b) The issuance by any court of competent jurisdiction of an injunction in any way preventing or restraining the use of the Airport or any part thereof so as to substantially affect Airline's use of the Airport in its conduct of an air transportation system and the remaining in force of such injunction, not stayed by way of appeal or otherwise, for a period of at least sixty (60) days.

(c) The issuance of any order, rule or regulation or the taking of any action by the Civil Aeronautics Board or the Civil Aeronautics Administration or other competent government authority, or the

occurrence of any fire, other casualty, act of God or the public enemy, substantially affecting, for a period of at least sixty (60) days, Airline's use of the Airport in its conduct of an air transportation system; provided, however, that none of the foregoing is due to any fault of Airline.

(d) The default by City in the performance of any covenant or agreement required to be performed by City herein or in any other agreement between City and Airline relating to the Airport or any part thereof, and the failure of City to remedy such default, or to take prompt action to remedy such default, within a period of sixty (60) days after receipt from Airline of notice to remedy the same.

(e) The substantial restriction of City's operation of the Airport by action of the Federal Government, or any department or agency thereof, under its wartime or emergency powers, or by action of the State of Illinois, or any department or agency thereof, and continuance thereof for a period of not less than sixty (60) days, provided such restriction adversely affects Airline's operations at the Airport.

Upon the exercise of this right of termination, all agreements and leases entered into between Airline and City relating to this Airport shall likewise stand terminated.

No waiver by Airline of default of any of the terms, covenants or conditions hereof, or of any other agreement between City and Airline relating to the Airport or any part thereof, to be performed, kept and observed by City shall be construed to be or act as a waiver of any subsequent default of any of such terms, covenants and conditions.

ARTICLE XIV

Right of Airline to Remove Property

Airline shall be entitled during the term of this Agreement and for a reasonable time after its termination, not to exceed forty-five (45) days, to remove from the Airport, or any part thereof, all aircraft, trade fixtures, tools, machinery, equipment, materials and supplies placed thereon by it pursuant to this Agreement, subject, however, to any valid lien which City may have thereon for unpaid fees or other amounts, payable by Airline to City hereunder or under any other agreement between City and Airline relating to the Airport or any part thereof, and provided that Airline shall repair all damage resulting from such removal.

ARTICLE XV

Definitions

The following terms, when used in this Agreement, shall have the following meanings:

Section 15.01. *Revenue Bond Ordinance.* "Revenue Bond Ordinance" shall mean the Ordinance entitled "Ordinance authorizing the issuance of Chicago-O'Hare International Airport Revenue Bonds Series of 1959 for the purpose of improving and extending said Airport and providing for payment of principal of and interest on said bonds", adopted the 29th day of December, 1958.

(a) Operation and Maintenance Expenses for such fiscal year as defined in the Revenue Bond Ordinance;

(b) depreciation on depreciable assets, and amortization in respect of engineering costs deferred, now or hereafter acquired with funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds or amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance) to the extent of the City's investment therein; such depreciation shall be taken on a straight line basis, at a rate designed to amortize the City investment in such depreciable assets over their estimated useful life;

(c) interest on funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds, or amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance) now or hereafter invested in whole or in part in capital expenditures, including engineering fees, acquisition of land and costs of removal of railroads, relocation of highways, land clearance and construction work, which interest shall be computed as follows:

(i) interest allocable to any fiscal year on such funds invested in non-depreciable assets shall be computed on the City's average investment in such assets;

total amount of all Approved Revenue Bonds outstanding requires for retirement thereof a sum which is less than one and twenty-five hundredths (1.25) times the sum of Principal and Interest Requirements for such fiscal year (as Principal and Interest Requirements are defined in Section 2.16 of the Revenue Bond Ordinance), then in that event the sum to be included in Airport Expense pursuant to this subparagraph (e) shall not exceed a sum equal to one and twenty-five hundredths (1.25) times the principal and interest requirements to effect payment on the next succeeding January 1 or July 1, as the case may be, of all Approved Revenue Bonds outstanding at the beginning of such fiscal year; and

(2) *Flight Fee Revenue Requirements.* The "Flight Fee Revenue Requirements" for any fiscal year during which any Approved Revenue Bonds are outstanding shall mean the excess of Airport Expense for such year over the Revenues (exclusive of all Flight Fees payable for such fiscal year by Airline Parties by reason of fee landings or by application of rentals for passenger ramp areas leased to any Airline Parties as payment on account thereof) for such year under the Revenue Bond Ordinance. Such Revenues shall include, without limitation, any amount of deferred income allocable to such year by reason of the provisions of Section 5.03(2) Sixth of the Revenue Bond Ordinance.

Such expenses include, without limitation, expenses incurred by City for the following items (without duplication of items) in connection with the Airport and properly allocable as aforesaid:

(j) depreciation on depreciable assets, and amortization in respect of engineering costs deferred, now or hereafter acquired with funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds, or amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance,

and funds from the Improvement Account referred to in Section 16.04 hereof or the Deferred Maintenance Account referred to in Section 16.05 hereof) to the extent of the City's investment therein; such depreciation shall be computed as follows:

(i) depreciation shall be taken on a straight line basis, at a rate designed to amortize the City investment in such depreciable assets over their estimated useful life; and

(ii) expenditures for periodic maintenance having a useful life of more than one year shall be considered to be capital expenditures for depreciable assets, unless such expenditures are relatively minor in amount; and

(k) interest on funds of City (other than Government Grants in Aid, proceeds derived from the sale of Approved Revenue Bonds, amounts charged to operation and maintenance expenses or the Reserve Maintenance Account under the Revenue Bond Ordinance and funds from the Improvement Account referred to in Section 16.04 hereof or the Deferred Maintenance Account referred to in Section 16.05 hereof) now or hereafter invested in whole or in part in capital expenditures, including engineering fees, acquisition of land and costs of removal of railroads, relocation of highways, land clearance and construction work, which interest shall be computed as follows:

(i) interest allocable to any fiscal year on such funds invested in non-depreciable assets shall be computed on the City's average investment in such assets;

(ii) interest allocable to any fiscal year on such funds invested in depreciable assets shall be computed on the depreciated City investment in such assets at the beginning of such fiscal year;

Moneys set aside in the Improvement Account during the term of this Agreement shall be deposited by City in trust with a Depositary to be used, not only during the term of this Agreement but also thereafter, solely for the purpose of making capital expenditures at the Airport approved, as evidenced by his certificate, by an engineer, selected by City, having the qualifications provided in the Revenue Bond Ordinance for the Consulting Engineer thereunder. the property taxes levied against the Building and the land on which it is located for the Comparison Year and (ii) the direct operating expenses for the Building for such Comparison Year exceeds the sum of the property taxes and the direct operating expenses for the Base Year.

(C) The term "property taxes" shall mean all taxes and assessments special or otherwise, levied upon or with respect to the Building and the land on which it is located, including any personal property taxes imposed upon the fixtures, machinery, equipment, apparatus, systems and appurtenances in, upon or used in connection with the Building for the operation thereof. The portion of such property taxes allocated by Landlord to the automobile dealership occupying the basement and a portion of the first floor of the Building shall be excluded from the definition "property taxes". Property taxes for the Base Year shall be computed for this purpose by multiplying the general rates for taxes payable in the year of execution of the Lease by the assessed value for the first year in which the land and the completed Building have been assessed for general property taxes. Taxes for subsequent Comparison Year shall be deemed to be the taxes payable in the respective calendar year even though the levy or assessment thereof may be for a different year.

(D) Direct operating costs shall include, but shall not be limited to, taxes (other than property taxes), heat, janitor service, elevator service, water, labor, contracted labor, licenses, permit and inspection fees, insurance, materials, service charges and all other direct costs of operating and maintaining the Building (excepting the portion of such costs allocated by Landlord to the automobile dealership occupying the basement and a portion of the first floor of the Building), 30.1% approximately of property taxes and operating cost shall be attributable to the automobile dealership.

All expenditures scheduled less often than annually shall be prorated over the period to which such expenditures are applicable. In the event, because of a major capital improvement or by the use of automation, the operating expenses in any year after the base year are reduced, then the operating costs for the Base Year shall be reduced for the purpose of determining escalation rent as though such improvement or automation had been in effect during the Base Year.

(E) "Calendar year" as used in this paragraph 3 shall mean January 1 through December 31, inclusive.

(F) Statements of Tenant's pro rata share of increased property taxes and direct operating expenses to be paid by Tenant as additional rent for any Comparison Year shall be rendered by Landlord to Tenant as soon as reasonably feasible following such Comparison Year and such additional rent shall be paid by Tenant to Landlord on the first day for the payment of Base Rent under this lease following the rendering of such statement. If the final lease year is less than twelve months, the additional rent shall be prorated. Landlord agrees to keep books and records reflecting direct operating expenses of the Building in accordance with generally accepted accounting principles.

Tenant shall have the reasonable right to inspect such books during business hours for the purpose of verifying the information in any such statement of additional rent.

(G) Total monthly rent to be paid by the tenant under the terms of this Rider "A" shall in no case exceed the following:

Eleven Thousand Five Hundred Nineteen and 78/100 Dollars ($11,519.78) per month during the 1st year of the lease term.

Eleven Thousand Eight Hundred Fifteen and 13/100 Dollars ($11,815.13) per month during the 2nd year of the lease term.

(H) Mortgage by Landlord. This lease is subject and subordinate to all mortgages which may now or hereafter affect the real property of which the demised premises forms a part, and to all renewals, modifications, consolidations, replacements and extensions thereof. This clause shall be self-operative and no further instrument of subordination shall be required by any mortgagee. Tenant hereby constitutes and appoints Landlord the Tenant's attorney-in-fact to execute any such certificate or certificates for and on behalf of Tenant.

Service. The Landlord shall provide the following services to Tenant:

(C) Water from City mains for drinking, lavatory and toilet purposes as customary for office use, drawn through fixtures installed by the Landlord.

(D) Operatorless Elevator Service in common with other Tenants at all times.

(E) Tenant shall pay direct to Commonwealth Edison Company the cost of all electrical consumption in the demised premises. The expense of metering such electrical consumption shall be borne by the tenant.

(F) Window washing of all windows in the premises, both inside and out, weather permitting at least once each month.

(G) Air Conditioning as hereafter described in paragraph 19.

(H) The Landlord does not warrant that any of the services above mentioned will be free from interruptions caused by repairs, renewals, improvements, alterations, strikes, lockouts, accidents, inability of the Landlord to obtain fuel or supplies, or any other cause or causes beyond the reasonable control of the Landlord. Any such interruption of service shall never be deemed an eviction or disturbance of the Tenant's use and possession of the Premises or any part thereof, or render the Landlord liable to the Tenant for damages, or relieve the Tenant from performance of the Tenant's obligations under this lease, provided, however, that Landlord will at all times use reasonable efforts promptly to remedy any situation which might interrupt such services.

The proposed ordinance transmitted with the foregoing committee report reads as follows:

Be It Ordained by the City Council of the City of Chicago:

Section 1. Permission and authority hereby are given and granted to Chicago Athletic Association, a corporation, its successors and assigns, upon the terms and subject to the conditions of this ordinance, to maintain and use as now constructed a vault under the surface of the east half of the north-south alley in the rear of the premises known as Nos. 10-16 S. Michigan Avenue. Said vault shall not exceed eighty (80) feet in length, seven (7) feet three (3) inches in width nor fifteen (15) feet in depth; for a period of ten (10) years from and after July 2, 1974.

The location of said vault shall be as shown on sketch hereto attached, which by reference is made a part of this ordinance. Said vault shall be maintained and used in accordance with the ordinances of the City of Chicago and the directions of the Commissioner of Streets and Sanitation. The grantee shall keep that portion of the public way over said vault in good condition and repair, safe for public travel over the same, and free from snow, ice and dirt to the satisfaction of the Commissioner of Streets and Sanitation.

Section 2. The grantee agrees to pay to the City of Chicago as compensation for the privileges herein granted the sum of Twelve Hundred Thirty-two dollars ($1,232.00) per annum, in advance, the first payment to be made as of July 2, 1974, and each succeeding payment on the same day and month annually thereafter. In case of the termination of the privileges herein granted the grantee shall, nevertheless, remain liable to the City of Chicago for the annual compensation which shall have become due and payable under the provisions hereof before the structures and appliances herein authorized are removed and the public way is restored as herein required.

Section 3. This ordinance is subject to amendment, modification or repeal, and the permission and authority herein granted may be revoked by the Mayor, in his discretion, at any time without the consent of said grantee. Upon termination of the privileges herein granted, by lapse of time or otherwise, the grantee, without cost or expense to the City of Chicago, shall remove the structures and appliances herein authorized and restore the public way where disturbed by said structures or appliances or by the removal thereof, to a proper condition under the supervision and to the satisfaction of the Commissioner of Streets and Sanitation; and in the event of the failure, neglect or refusal of said grantee so to do, the City of Chicago will have the choice of either performing said work and charging the cost thereof to said grantee, or determining what the cost of said work shall be and billing the grantee for said cost. The Commissioner of Streets and Sanitation shall have the authority to determine the cost of the above work and his decision as to the amount shall be final and binding.

Section 4. The surety, to the extent of its penal bond as provided in Section 5, and the grantee will hold and save the City of Chicago harmless from any and all liability and expense, including judgments, costs and damages, for removal, relocation, alteration, repair, maintenance and restoration of the structures or appliances herein authorized and from any and all damages thereto on account of the location, construction, reconstruction, alteration, repair or maintenance of any public ways, bridges, subways, tunnels, vaults, sewers, water mains, conduits, pipes, poles and other utilities. For the City of Chicago to recover from the surety and grantee under this Section, it is not necessary that the City of Chicago first make said removal, relocation, alteration, repair, maintenance or restoration. The Commissioner of Streets and Sanitation is hereby authorized to determine what cost would be involved to perform said removal, relocation, alteration, repair, maintenance or restoration. The grantee and the surety, to the extent of its bond, upon receiving written notification from the Commissioner of Streets and Sanitation of the cost shall pay said amount. The decision of the Commissioner of Streets and Sanitation shall be final and binding.

Section 5. The permission and authority herein granted shall not be exercised until a permit authorizing same shall have been issued by the City Comptroller and no permit shall be issued until the grantee herein shall execute a good and sufficient bond to the City of Chicago in a penal sum, the amount of which is to be determined by the City Comptroller, but, in no event shall the amount be less than $10,000, with sureties to be approved by the City Comptroller, conditioned upon the faithful observance and performance of all (and singular) the conditions and provisions of this ordinance, and conditioned further to indemnify, keep and save harmless the City of Chicago against all liabilities, judgments, costs, damages and expenses which may in anywise come against said city in consequence of the permission given by this ordinance, or which may accrue against, be charged to or recovered from said city from or by reason or on account of any act or thing done or omitted or neglected to be done by the grantee in and about the construction, reconstruction, maintenance, use and removal of said structures or appliances and the restoration of the public way as herein required. Said bond shall be continuing in effect until the structures or appliances herein authorized are removed and the public way is restored as herein required.

Section 6. The surety, as to the extent of its penal bond as provided in Section 5, and the grantee will further be liable to the City of Chicago for the annual compensation for the use of the public way.

Section 7. This ordinance shall take effect and be in force from and after its passage; provided said grantee file a written acceptance of this ordinance, together with the bond hereinabove provided for, with the City Clerk within sixty (60) days after the passage of this ordinance.

CITY OF CHICAGO
DEPARTMENT OF LAW

September 24, 1974.

To the Honorable Mayor and City Council of the City of Chicago:

Re: William Cousins, Jr., et al.

v.

City Council of the City of Chicago, et al. United States Court of Appeals for the Seventh Circuit, Nos. 73-1891 and 73-2127.

LADIES AND GENTLEMEN: The United States Court of Appeals on September 9, 1974, filed an opinion, affirming the judgment of the district court insofar as it was favorable to the City Council and reversing it insofar as it was unfavorable.

This was the second time that this case, involving the constitutionality of the 1970 reapportionment of the wards of Chicago has been before the court of Appeals. The action challenged that reappor-

tionment as racially and politically gerrymandered. At the first trial, the district court found that nothing impermissible had occurred. On the first appeal, the Court of Appeals held that the plaintiffs had not proven their case, but, because of the public importance of the issues, remanded the matter to the district court for another trial before a different judge.

At the second trial practically the same evidence was presented by plaintiffs as at the first trial, except that they produced a ward map of Chicago of their own making, which they claimed had been drawn without regard to race. The plaintiffs' map contained 16 wards with black majorities, whereas the official map contains 15 such wards. The district court held that such political considerations as may have influenced the redistricting were nonjustifiable political questions, and it further found that no purposeful diminution of the voting strength had been proven, except in one-ward—the 7th. To correct the racial gerrymandering it found to have occurred in the 7th Ward, the district court ordered an exchange of approximately half the population of the 7th and 8th wards, resulting in the creation of two wards, each with a 52% black majority. A special election was ordered and held in the 7th ward. The former incumbent did not run in this election and a new alderman was elected and took office.

The plaintiffs appealed the general judgment that no racial gerrymandering had occurred in 49 of the 50 wards of the city, and they also appealed the district court's denial to them of their attorney's fees. The City Council cross-appealed the findings and orders with respect to the 7th and 8th Wards.

The second appeal was heard and decided by the same panel of judges that had sat on the first appeal. This time, on the authority of the Supreme Court cases of Whitcomb v. Chavis, 403 U.S. 124 (1971), White v. Regester, 412 U.S. 755 (1973), Kilgarlin v. Hill, 386 U.S. 120 (1967), and Wright v. Rockefeller, 376 U.S. 52 (1964), the court rejected plaintiffs' contention that in cases of alleged racial gerrymandering, the legislative enactment is to be deemed "inherently suspect" and in consequence the burden of proof must be shifted to the defendants to justify the legislation. The court held that the usual rule that legislation is presumed to be constitutional is applicable to cases of alleged racial gerrymandering, and the burden is on those attacking the enactment to prove it invalid, not by a mere preponderance of the evidence, but by "clear and convincing evidence" to a moral certainty. This burden of proof the court found the plaintiffs had not met by presenting proof of prior, historic discrimination.

As to the 7th Ward, the court concluded that the evidence showed that the 1970 changes in its boundaries had been occasioned by prior changes made in the 9th and 10th Wards, so as to make the 9th more compact, which of course is a legitimate purpose. The court held that the fact the legislators were aware of the racial composition of the areas affected did not constitute proof of purposeful racial discrimination.

The contention that the 14th and 16th Wards had been racially gerrymandered was also disallowed. The court held that the territory encompassed by the 14th, 15th and 16th Wards could not, because of its clearly delineated racial makeup, be divided as plaintiffs claimed, into three compact wards, two of which would be majority black.

The 31st Ward was also found not to have been gerrymandered to the disadvantage of Puerto Rican voters. The transfer of some Puerto Ricans in the eastern end of the 31st Ward to the 26th Ward had resulted in increasing their strength in the 26th Ward. The court found that the Puerto Rican population of Chicago is so distributed that it would be impossible at present to create a single ward with a Puerto Rican majority.

In addition, the court ruled that the wards created by the 1970 reapportionment were sufficiently compact to satisfy state law, which is controlling in the matter of compactness.

However, the court limited its reversal of the district court's invalidation of the 7th Ward boundaries so as to the present incumbent to finish out his term, which has less than a year to run.

Enclosed is a copy of the Court's opinion

Sincerely,

(Signed) RICHARD L. CURRY,
Corporation Counsel.

Prohibition Removed for Successive Terms in Office of City Treasurer of Chicago.

The Committee on Finance submitted a report recommending that the City Council pass the following proposed ordinance transmitted therewith:

WHEREAS, The Chicago City Treasurer is the only home rule unit treasurer in Illinois who is forbidden by law from succeeding himself in office; and

WHEREAS, A similar limitation which had existed in the 1870 Illinois Constitution prohibiting County treasurers from succeeding themselves was deleted from the 1970 Constitution; and

WHEREAS, The State Treasurer was also relieved of the disqualifying language of the 1870 Constitu-

tion by the new Constitution and now may serve consecutive terms, if nominated and elected; and

WHEREAS, There is no provision in the Constitution or in the statutes of Illinois forbidding other municipal treasurers from succeeding themselves; and

WHEREAS, This anachronism in the law, which now applies to Chicago alone, serves as an unreasonable limitation upon and an unwise disqualifier of any incumbent City Treasurer whose record and accomplishments may merit continued popular support; and

Whereas, the parties hereto by this Agreement intend (a) to fix their respective responsibilities, with reference to each other, with reference to the accomplishment of said Project No. 8-17-0022-05 and with reference to participation by the United States, and (b) to designate the parties to accept, receipt for and disburse all funds and payment of the Federal Government and of the Municipality used or to be used in payment of the costs and expenses as shall have been incurred by the parties hereto or either of them.

CITY shall provide said construction documents within time specified in completion schedule, after approval of said Design Development Phase as set forth in subparagraph II A(2). The Project construction cost estimates referred to in this subparagraph II A (3) and in subparagraphs II A (1) and (2) shall be of a detailed nature such as to permit a review of the design and to permit changes, substitutions, or reductions in the scope of the work as may be necessary to complete said Project within said Construction Budget and shall be in a form satisfactory to AUTHORITY. In the event that any Project construction cost estimate of either CITY or AUTHORITY exceeds said construction Budget as hereinabove set forth (as the same shall be

adjusted upward by an additional escalation allowance required by delays occasioned by act or neglect of AUTHORITY), CITY shall, after review and upon the written request of AUTHORITY, continue to revise any or all of the Project design, drawings, specifications and estimate in manner satisfactory to AUTHORITY, until the revised estimate conforms to said Construction Budget. AUTHORITY shall have the right to solicit bids even though any Project construction cost estimate obtained at this phase of CITY's services exceeds said Construction Budget. CITY shall proceed as hereinafter set forth in subparagraph II A(4) (a) if the lowest responsible bid proposal obtained, plus the estimated allowance in the construction cost estimate for non-AUTHORITY-originated Project change orders to be issued during construction, is in excess of said Construction Budget.

(4) Construction Phase

(a) CITY shall review and evaluate and make written recommendations to AUTHORITY for awarding construction contracts. If the lowest responsible bid proposal obtained on any solicitation of bids, plus the estimated allowance in the construction cost estimate for non-AUTHORITY-originated change orders to be issued during construction, is in excess of 10% of said Construction Budget, AUTHORITY may award said construction contract to said lowest bidder, or require CITY to, continue to revise any or all of the Project design, scope, quality, drawings and

specifications to the end that the construction cost be reduced, so as not to be in excess of said Construction Budget. AUTHORITY shall solicit new bids on said revised Project design, drawings and specifications. AUTHORITY may designate as its representative the Engineering Manager to cooperate with CITY while it is performing such revision, and all recommended revisions in design, deletions, substitutions and specifications shall be subject to written approval by AUTHORITY. The right of AUTHORITY to require such revision and rebidding shall not be exhausted by a single revision and rebidding, but shall be a continuing right until the lowest responsible bid received is not in excess of said Construction Budget.

(b) CITY, if requested by AUTHORITY, shall make recommendations on any claims between AUTHORITY and any contractor with whom AUTHORITY has a contract relating to said Project and any other matters relating to the execution and progress of the work or the interpretation of said Contract Documents. CITY shall provide all drawings called for during construction and check and approve samples, schedules, shop drawings, as-built drawings and other submissions to assure compliance with the design concept of said Project and the contractors obligations as set forth in said Construction Contract Documents (including contractors' initial approved progress schedule).

(c) CITY shall provide, during the construction phase, the following services:

(1) Attend construction job meetings to assist and interpret the design documents.

(2) A representative of CITY's architectural office shall inspect the construction work at least bi-monthly to keep familiar with the work and shall, in writing, advise AUTHORITY that, in his best judgment, the construction work is proceeding in accordance with said construction documents.

(3) Review and make written recommendations to AUTHORITY concerning all bulletins, proposals, revisions in drawings and change orders approved or directed by AUTHORITY.

(4) Review and assemble all warranties, parts list, guarantees, and operating manuals and transmit to AUTHORITY.

(d) AUTHORITY will provide complete field supervision during the construction and acceptance phases. However, AUTHORITY reserves the option to request CITY to perform part or all of field supervision services. Compensation to the CITY for these option services shall be on the basis of direct payroll cost plus fifty-three percent (53%) of said direct payroll cost to cover burden and overhead.

(5) Supporting Reports

CITY shall prepare and furnish such monthly reports

during the design phase or other periodic progress reports as may be required by AUTHORITY.

(6) Drawings and Specifications

(a) CITY shall furnish AUTHORITY bound printed sets of working drawings and specifications as requested.

(b) Each copy of the specifications shall have proposal forms and "Call for Bids" (not bound in).

(c) No trade names or manufacturers are to be noted on drawings. When trade names, products, etc. or names of manufacturers are listed in the specifications for any part of the work, more than one such name shall be listed followed by the clause, "or approved equal".

(7) Shop Drawings

(a) CITY shall check all shop drawings, brochures and samples submitted by contractor and shall supply AUTHORITY with required copies of all shop drawings, brochures, samples and sepias after they are checked and recommended for approval.

(b) CITY shall make provisions in the specifications to require the contractors to supply sufficient copies of shop drawings to comply with the requirements as directed in Manual of Procedures.

(8) As-Built Drawings

(a) Upon completion of the construction work and prior to the final payment to CITY, the original tracings shall be turned over to AUTHORITY. Before turning over such tracings CITY shall record or cause to be recorded on them all alterations that have been made

in the completed Project so that the tracings will be a final record of the work "As-Built".

(b) CITY agrees that these tracings when so delivered are the property of AUTHORITY, and that AUTHORITY shall have full right and privilege to use, and to authorize others to use, such tracings in any manner and for any purposes, at its sole election, without further permission or payment to CITY.

PROJECT DESCRIPTION
New Des Plaines Station and Terminal
W/NW Route, Congress Branch
Forest Park, Illinois
CTA Job Order No.9638
Construction Budget $5,320,000.00

Des Plaines Station is the western terminus of the Congress Branch of the West-Northwest Rapid Transit System. The station was constructed as a temporary structure in 1956 and does not provide adequate facilities for the passengers and transportation personnel.

The pattern of present vehicular traffic at this location, which is adjacent to a ramp entrance to the Eisenhower Expressway, is a source of constant traffic congestion and delay. This project will relocate bus operations from the immediate vicinity of the expressway ramp to a secondary street and thus improve vehicular traffic flow through this area.

It is the intent of this project to replace the present station, platform, canopies and employee facilities at this location with a new transportation complex.

The new facility will be comprised of a new two-story glass and steel building with the upper level housing employee facilities and offices, and the lower level will contain the entrance and fare controls to the train platform via a connecting passage.

A bus terminal shall be located immediately to the north of the station. Passengers shall enter the station via a connecting tunnel below the track area that leads to the fare control area.

The present parking area to the south of the station shall be developed to accommodate a minimum of 450 cars and shall have provisions for a 55 car Kiss-N-Ride area and berthing for non-CTA buses. Walkways shall be covered. The station platform shall be constructed of steel and concrete. Canopy shall extend the full length of platform and lighted with recessed flourescent fixtures. Infra-red heat lamps shall be provided for passenger comfort.

Trackwork will be realigned and reconstructed to meet the new conditions.

Demolition and construction work must be scheduled so as not to interfere with the continuous operation of the transit system. A staging program will be developed by Authority and Consultant, and the Contractor will coordinate these phases with the Authority to permit a smooth flow of traffic at all times.

PROJECT DESCRIPTION
79th Station Remodeling and Auxiliary Entrance
West/South Route, Dan Ryan Branch
Chicago, Illinois
CTA Job Order No. 9640
Construction Budget $933,000.00

The 79th Street Station of the Dan Ryan Route was opened on September 28, 1968 with an average weekday traffic of 4,400 passengers. In May of 1973, the traffic had grown to 10,600, or approximately 2-1/2 times the opening weekday volume and exceeding our estimate of 4,400 by 6,200 passengers per day.

The 79th Street Station is now ranked as the fourth highest station entrance on the entire Chicago Rapid Transit System. Because of this tremendous increase in traffic, the fare collection-passenger control facilities are now totally inadequate to serve the still growing passenger volume. This problem is further compounded by the need for westbound passengers to cross the busy thoroughfare to board the buses.

The intent of this project is to design and construct an auxiliary entrance and exit facility on the north side of 79th Street and to remodel the present station and platform on the south side to accommodate the growing trend of passenger volumes. The present station will be extended to the south to permit the installation of fare control facilities at street level as an addition to the fare controls at the platform level for the rush hour periods.

Preliminary feasibility plans have been studied indicating that this project can be staged without interruption of service to the public.

PROJECT DESCRIPTION
95th Windscreen and Additional Passenger Controls
West/South Route, Dan Ryan Branch
Chicago, Illinois
CTA Job Order No. 9641
Construction Budget $150,000.00

The 95th Street Station is the southern terminus of the Dan Ryan-Lake Street Rapid Transit System. The original design anticipated a flow of 11,000 passengers per day. Our present passenger flow is in excess of 22,900 passengers who pass through this station to board the trains. This volume of traffic entering the station exceeds the present capacity of the fare controls and as part of this project a new two-agent booth will be installed to accommodate the passengers.

The Station and Transportation building complex is built over the median of the Dan Ryan Expressway and is connected by two pedestrian bridges over the expressways to the bus loading areas. Although the bridges are protected by a roof, the open sides offer little or not protection to the passengers waiting to get into the station from the vagaries of nature. As part of this project, the pedestrian bridges will be enclosed with a curtain wall of reversible windows made of aluminum and glass. The curtain wall will provide the protection of the entering the exiting passengers and the revolving windows will permit maintenance and cleaning operations from within the bridge, eliminating the costly and dangerous scaffolding procedures over the express lanes.

Execution of Easement Agreement Authorized with Village of Norridge for Construction of Foster Avenue Sewer System Contract No. 3.

The Committee on Finance submitted a report recommending that the City Council pass the following proposed ordinance:

Be It Ordained by the City Council of the City of Chicago:

Section 1. That the Mayor be and he is hereby authorized and directed to execute, the City Clerk to attest, the Commissioner of Public Works to approve, and the City Comptroller to accept and file for record, upon approval as to form and legality by the Corporation Counsel, a certain Agreement by and between Village of Norridge and the City of Chicago, whereby the City of Chicago will revise its existing Foster Avenue Sewer System Contract No. 3, which provides for construction of a 30 inch diameter Sewer in N. Oriole Avenue, from W. Berwyn Avenue to W. Foster Avenue to accommodate Norridge drainage by making the Sewer 42 inches in diameter between the same limits. The cost of design revisions and increased costs to City of Chicago for constructing the larger size sewer will be paid for by the Village of Norridge in the amount of $25,000.00. Said Agreement is in form and substance as follows:

This Agreement, made and entered into this..... day of ....., 1974, by and between the Village of Norridge, hereinafter referred to as

"Norridge", and the City of Chicago, hereinafter referred to as "Chicago";

Witnesseth:

Whereas, Norridge, being a municipal corporation organized and existing under the laws of the State of Illinois and having among its purposes the ownership, maintenance and operation of local sewerage systems; and

Whereas, Chicago is a municipal corporation organized and existing under the laws of the State of Illinois, having among its purposes the ownership, maintenance and operation of local sewerage systems; and

Whereas, parts of Norridge and the surrounding area are without adequate storm sewerage, and portions of the existing storm sewerage systems are overloaded and cause neighborhood inconvenience; and

Whereas, the territorial limits of Norridge are contiguous with the territorial limits of Chicago; and

Whereas, Chicago proposes, as part of the Foster Avenue Sewer System, Contract No. 3, to construct a 30-inch diameter sewer in N. Oriole Avenue from W. Berwyn Avenue to W. Foster Avenue, which could be increased in size to accommodate Norridge drainage by making it 42-inches in diameter between the same limits.

Whereas, the construction of the Foster Avenue Sewer System, Contract No. 3, hereinafter referred to as "Foster No. 3", would give considerable relief to the storm sewerage system within Norridge as well as improving drainage within the surrounding areas of Chicago; and

Whereas, the parties are desirous of entering into an agreement whereby Chicago will revise the design of Foster No. 3, with the cost of design revisions and the increased costs to Chicago for constructing a larger size sewer in Oriole Avenue between Berwyn Avenue and Foster Avenue to be paid by Norridge.

Now, Therefore, in consideration of the mutual covenants and agreements to be kept and performed by the respective parties hereto, it is agreed as follows:

1. *General Description of the Design Revisions*

Chicago shall revise the existing contract documents of Foster No. 3 to substitute a 42-inch diameter reinforced concrete pipe sewer for a 30-inch diameter R.C.P. sewer for a length of 655 lineal feet, redesign the proposed reinforced concrete structures to suit, and do all collateral and appurtenant work required to coordinate these changes into the contract plans and specifications. A bulkheaded opening for a future 30-inch diameter Norridge sewer shall be provided in the west wall of the sewer structure to be constructed at the intersection of Oriole Avenue and Foster Avenue.

2. *Awarding of Contract*

The contract for Foster No. 3 shall be advertised for bids and awarded by Chicago without participation of any kind by Norridge.

3. *Construction and Supervision*

The Foster No. 3 project shall be constructed and supervised during construction by Chicago, and Chicago, or its contractor, shall have complete charge and full supervision of the work.

4. *Sewer Ownership and Use*

All right, title and interest to the Foster No. 3 sewer shall be vested in Chicago. However, Chicago grants Norridge perpetual use of the sewer and the right to connect their sewerage to this project at an outlet to be provided at Oriole Avenue and Foster Avenue. This outlet shall be subject to the following limitations: that the maximum diameter of the sewer to be constructed by Norridge at its expense shall be 30-inches; that the maximum Norridge discharge shall be 18 cfs from a residential area of 20 acres; and that Norridge shall negotiate an agreement with the Bureau of Sewers of Chicago's Department of Water and Sewers for an out-of-town service connection fee before any attempt is made to utilize the subject outlet.

5. *Method of Payment*

Norridge shall pay Chicago the lump sum of Twenty-five Thousand and No/100 Dollars ($25,000.00) at the time that construction begins on the Foster No. 3 project, which represents the additional design and construction costs incurred by Chicago, but does not include the service connection fee mentioned in Paragraph 4.

6. *Surcharge*

Chicago cannot and does not assume any responsibility for preventing surcharge of this sewerage system nor does it assume the responsibility for the flooding of land, homes or any other structure caused by a surcharge.

7. *Time*

In the event construction of the Foster No. 3 project does not begin within four (4) years from the date of this agreement, then, at the option of either party, this agreement shall be declared null and void and both parties shall be released from any obligation hereunder.

8. *Maintenance and Operation*

Chicago agrees to maintain and operate the Foster No. 3 sewer at no cost to Norridge. However, should Norridge discharge sewage waste, reaching the outlet at Oriole Avenue and Foster Avenue, that is in violation of Chicago's Industrial Waste Ordinance, then Norridge agrees to correct such violation, and further agrees to reimburse Chicago for any damage repairs made necessary by such Waste Ordinance violation.

During construction by Norridge of the 30-inch sewer westward from the outlet provided by Chicago, the contractor for Norridge shall, upon removal of the bulkhead placed by Chicago at the outlet, prevent any construction materials or debris from entering the completed portions of Chicago's sewer system.

In Witness Whereof, the parties hereto have caused this Agreement to be executed by their proper officers thereunto duly authorized.

The above elevations as fixed shall be measured from Chicago City datum as established by the City Council of the City of Chicago.

The roadway(s) of the several street(s) heretofore specified between the points herein described, also the roadway(s) of all intersecting alley(s) extended from the curb line to the street line on each side of said specified street(s) between the points herein described, after removing trees therefrom, shall be so graded by cutting or filling and compacted by rolling with a roller of ten (10) tons weight that after the grading of the roadbed(s) is completed and the pavement herein described placed thereon, the surface of the finished pavement at the center of the roadway of each of said specified street(s) shall be at the elevation of the top of the curbing herein described; and the surface of the said finished pavement at the summits in the gutters between catchbasins and adjoining the roadway face of the curbing shall be three (3) inches below the top of said curbing, and at the catchbasin inlets in the gutters adjoining the roadway face of the curbing shall be nine (9) inches below the top of said curbing. The slope of the gutters adjoining the roadway face of said curbing shall be uniform from the summits to the catchbasin inlets.

A transverse section of the surface of the finished pavement and gutters shall be an arc of a circle passing through the said gutter elevations and the elevation of the center of said finished roadway at every part of the roadway of said specified street(s) between the points herein described.

In all intersecting alley(s) herein specified at the street lines of said specified street(s) the surface of the finished pavement adjoining the curbing shall be even with the top of the curbing and the surface of the finished pavement at the center of the roadways of said alley(s) shall be three (3) inches below the top of the curbing; and a transverse section of the surface of the finished pavement at the street line of said specified street(s) shall be an arc of a circle passing through the surface of the pavement adjoining said curbing and the surface of the pavement at the center of said finished roadway(s). The surface of the said pavement thence shall slope gradually to meet the surface of the finished pavement at the curb lines of said specified street(s).

On the sub-grade as formed and compacted shall be spread an insulation course of limestone screenings. Said insulation course shall be one (1) inch in thickness and shall extend across the full width of the roadbed.

On the insulation course as formed and compacted shall be spread a foundation course consisting of a layer of crushed limestone of the best quality, broken so as to pass through a ring of four (4) inches internal diameter and held on a ring of two (2) inches internal diameter. The stone spread shall be well graded as to sizes. It shall be evenly distributed so as to leave no pockets filled with the small size stone. This layer shall be thoroughly rolled with a self propelled three wheel roller, weighing not less than ten (10) tons. The rolling shall begin at the edge of the pavement and the roller shall move parallel with the center line of the roadway. The roller shall progress gradually towards the center of the roadway uniformly lapping each proceeding track, covering the entire surface with the rear wheels and continuing until the stone does not creep or move ahead of the roller. After the crushed limestone has been thoroughly rolled and keyed, limestone screenings shall be applied gradually over the surface and the rolling continued until sufficient screenings have been applied to completely fill the interstices. The screenings shall be swept in with hand brooms to properly fill the voids. The spreading and rolling shall continue until no more screenings will go in dry. No excess of screenings shall be used before applying water. Immediately after the voids have been filled with screenings, the macadam shall be sprinkled until saturated, the sprinkler being followed by a roller. More screenings shall be added if necessary. The sprinkling, sweeping and rolling shall continue until a grout shall be formed of the screening and water that will fill all the voids, and form a wave of grout before the wheels of the roller. The quantity of screening and water necessary to fill the voids shall be determined by the engineer and shall be sufficient to produce a rough, granular surface. The rolling, at all times, shall begin at the sides, and then progress toward the center, thoroughly covering the entire surface with the rear wheels. When compacted, this layer shall measure not less than five (5) inches in thickness.

Upon the finished waterbound macadam base there shall be uniformly applied by an approved type of spreader box, two (2) inch stone to a depth providing a total base course thickness of three (3) inches after final compaction. After shaping to grade and rolling with a ten (10) ton roller three-quarter (¾) inch stone chips shall be broadcast and broomed into the surface voids at the rate of fifteen (15) pounds per square yard. Liquid asphalt at a temperature of 140 degrees F. shall be uniformly applied by a pressure distributor at a rate of one and one-half (1½) per gallons per square yard. Stone chips shall again be broadcast and broomed uniformly over the surface at the rate of fifteen (15) pounds per square yard. Liquid asphalt shall be uniformly applied by a pressure distributor at the rate of one-half (½) gallon per square yard. Stone chips shall be broadcast again at the rate of ten (10) pounds per square yard. The surface shall then be thoroughly rolled. The asphalt shall conform to the State Specification for Emulsified Asphalt R. S. 2, Page 640 of Illinois Standard Specifications for Road and Bridge Construction adopted January 2, 1952.

On the said foundation course shall be placed an asphaltic concrete surface course two (2) inches in thickness consisting of an asphaltic concrete mixture conforming to the standard requirements of the Illinois State Division of Highways for Type 1-11 Asphaltic Concrete adopted January 2, 1952, as follows: The asphaltic mix shall consist of a mineral aggregate bonded with the asphaltic

cement. The mineral aggregate shall consist of the best quality of crushed gravel or crushed stone in sizes graduated in accordance with the following table, viz:

Asphaltic Concrete Surface Course, Fine Dense Graded Aggregate Type

Passing ½ inch sieve	95-100%
Passing ½ inch, retained on No. 4 sieve	45- 65%
Passing No. 4 retained on No. 10 sieve	10- 30%
Passing No. 10 retained on No. 40 sieve	5- 18%
Passing No. 40 retained on No. 50 sieve	7- 22%
Passing No. 80 retained on No. 200 sieve	5- 13%
Passing No. 200 sieve	4- 8%
Bitumen	5- 7%

(Table 45.11 p. 247 State Specifications)

The asphaltic cement shall conform with the standard requirements of the Illinois State Division of Highways for Grade P.A. 6 Paving Asphalt, adopted January 2, 1952. It shall have a flash point (Cleveland open cup) 500 plus Fahrenheit. It shall have penetration at seventy-seven (77) degrees Fahrenheit of seventy-five (75) to eighty-five (85), and at least ninety-nine and five-tenths (99.5) per cent of bitumen shall be soluble in carbon disulphide.

When fifty (50) grams of said paving asphalt is heated in an uncovered tin box five and one-half (5½) centimeters in diameter and three and one-half (3½) centimeters in depth, and is held at a temperature of three hundred and twenty-five (325) degrees Fahrenheit for five (5) hours, then it shall have lost not over two (2) per cent by weight and the pentration of the residue thus obtained shall not be less than seventy (70) per cent of the penetration before such heating. Said penetration being determined as herein described. Said paving asphalt shall have a ductility of not less than one hundred (100) centimeters being determined by elongating a briquette Dow form of said paving asphalt at uniform rate of five (5) centimeters per minute at a temperature of seventy-seven (77) degrees Fahrenheit.

The paving asphalt and mineral aggregate shall be mixed when heated between three hundred (300) and three hundred fifty (350) degrees Fahrenheit in an approved mixer to produce a homogenous mixture in which all particles of aggregate are coated uniformly. The heated mixture shall be delivered to the pavement in trucks with approved clean tight dump bodies. The temperature when delivered at the street shall be between two hundred fifty (250) and three hundred fifty (350) degrees Fahrenheit. Upon arrival the asphaltic mixture shall be spread upon the prepared base at a uniform depth and consistency so that the thickness when compacted as herein described will be two (2) inches.

Immediately after the asphalt surface course shall be spread it shall be connected thoroughly and uniformly with a three (3) wheel roller or a tandem roller. The asphalt paving mix shall be dumped first upon approved steel dump pans outside of the area on which it is to be spread. Immediately thereafter it shall be distributed into place with shovels and spread with rakes in layers of uniform density and correct depth, unless a spreading machine is used. If a spreading machine is used it shall be of a type approved by the Board of Local Improvements. Immediately after the surface course mixture is placed it shall be compacted thoroughly with a three wheel roller or a tandem roller. One (1) or more three-wheel rollers and one (1) or more tandem rollers will be required. The actual number of such rollers to be determined by the Engineer in accordance with the progress of the work. If the production of the asphalt plant delivered to the pavement exceeds seventy-five (75) tons per hour additional rollers shall be furnished as directed by said Engineer. After a final rolling the asphalt surface course shall at all points have a density of not less than ninety-five (95) per cent of the maximum possible density of a voidless pavement composed of the same materials in like proportions.

IV-2 Pozzolanic Base Course

On the subgrade as formed and compacted shall be placed and compacted to the depth shown on the plans and as herein provided.

(a) The pozzolanic base course shall be constructed in layers not more than six (6) inches (compacted) in thickness. When the thickness specified is more than six (6) inches the base course shall be constructed in two (2) or more approximately equal layers. Each layer shall be deposited, full-lane width, directly on the prepared subgrade or on the preceeding layers of compacted mixture with a mechanical spreader box of a type approved by the Engineer. Where the base must be constructed in more than one layer, the previous layer shall be maintained in a moistened condition until the succeeding layer is placed. After having been tested for density and approved by the Engineer, the previous layer shall be raked to a depth of one (1) inch and dampened with water immediately prior to placing the succeeding layer so that the layers are in it together. The second layer must be placed the same way as the first layer. The Engineer of the Board of Local Improvements shall determine when the base course shall be constructed in one or more lifts. When placed, the pozzolanic mixture shall be free from segregation and shall require minimum blanding and manipulation. Immediately after placing the mixture shall be compacted with a pneumatic-tired roller, or with a vibratory compactor, or with a combination of the two. The base course, shall be given a final rolling with a three wheel or tandem roller. If the pozzolanic base is placed on gradual sub-base, the pozzolanic base shall be compacted to at least 100% of maximum density except that if more than one layer is required the first layer shall be compacted to 97% of maximum density and succeeding layers shall be compacted to 100% of maximum density.

(b) All pozzolanic mixture shall be placed and compacted the same day as it is mixed. The entire base course within the increment of work shall be completed within 24 hours.

(c) Except in specific cases, when otherwise permitted by the Engineer, the pozzolanic base course mixture shall be placed between April 15 and October 15 and only when the temperature is 40 or more.

(d) The three wheel or tandem rollers shall weigh from 6 to 10 tons and shall weigh not less than 200 pounds nor more than 325 pounds per inch width of roller. The compression developed by the pneumatic tired roll shall be not less than 225 pounds per inch of tire width.

IV-3 Materials.

All materials shall conform to the following requirements:

(a) Lime. High Calcium hydrated lime or monohydrated dolomitic lime shall be used. The lime shall have a total oxide (calcium and magnesium)

equivalent to not less than 85% and a loss of ignition of not more than 25%. Monohydrated dolomitic lime shall have only the calcium component hydrated. Exposure of the lime to air shall be held to a minimum. If more than 10% of the lime has reverted to a carbonate, it shall not be used.

The tests prescribed by this specification shall be performed at the option of the Engineer. At the time of mixing the pozzolan shall be in a finely divided condition such that 95% shall pass a ½ inch sieve when dry-sieved.

(c) Coarse Aggregate. The coarse aggregate shall be gravel, crushed stone, crushed slag or boiler slag meeting the following requirements:

(1) Gravel, crushed stone or crushed slag. The gradation for all three materials, shall be as follows:

(2) Boiler Slag: The slag shall be wet bottom boiler slag produced as a by-product of a power plant burning pulverized bituminous coal. The slag shall be composed of hard durable particles and shall be free of excessive or harmful amounts of foreign substances. Boiler slag or granulated slag in an oven dry condition shall meet the following gradation requirements:

Sieve	*Per Cent by Weight Passing*

(d) Samples: The contractor, shall at his own expense, submit to the Engineer a minimum of 25 pounds of lime, 100 pounds of fly ash and 150 pounds of the coarse aggregate which he proposed for use in the pozzolanic mixture. The lime, when sampled, shall immediately be placed in a sealed container and shall be kept sealed. Samples shall be furnished at least 45 days prior to the construction of the pozzolanic base course. The samples submitted will be tested for acceptance of materials and also to determine whether or not they will produce a satisfactory mixture; and will be used to determine preliminary proportions for the mixture composition.

IV-4 COMPOSITION OF MIXTURE.

(a) The lime, pozzolan and aggregate shall be proportioned within the following limits on a dry-weight basis:

PERCENT BY WEIGHT OF TOTAL DRY MIXTURE

Ingredient	*Gravel, Crushed Stone, Crushed Slag or Aggregate Blend*	*Boiler Slag*
Lime	2- 5	2- 4
Pozzolan	8-16	15-30
Aggregate	79-90	56-78

(b) The actual proportions of lime, pozzolan, water and aggregate will be set by the Engineer before work begins and will be based on tests conducted on mixtures composed of samples of the constituent materials furnished by the Contractor. The right is reserved by the Engineer to make such changes in proportions during the progress of the work as he may consider necessary.

(c) The composition of the mixture shall be such that when molded into cylinders, cured and tested as stated in the following paragraph, each cylinder shall have a minimum compressive strength of 450 psi and a maximum weight loss of 14% after 12 cycles of freezing and thawing.

(d) Test cylinders shall be molded at the optimum moisture content and maximum density in accordance with AASHO Designation T 160, Method C, except that the 5 lift requirement is replaced with 3 lifts and no replacement of coarse aggregate (+¾ inch sieve) is made. The molded specimens shall immediately be placed in an oven with forced air circulation for 7 days at 100+3 F. At the end of 7 days, the test cylinders for compressive strength testing shall be removed from the containers, allowed to cool to room temperature, soaked for four hours, capped and broken for compressive strength within one hour of time of removal from water. The specimens to be tested for freeze-thaw resistance shall be cured in the same manner as the strength specimens without the 4 hour soaking period. After curing the specimens shall be subjected to 12 cycles of freezing and thawing in accordance with AASHO Designation D-560, Sections 5, 9 and 10 pertaining to specimen No. 2 (weight loss specimen).

IV-5 MIXING.

(a) The constituents of the mixture shall be accurately proportioned and thoroughly mixed in a mechanical mixer at a central mixing plant. In all plants, the water shall be proportioned by weight or volume and there shall be means by which the Engineer may readily verify the amount of water per batch or the rate of flow for continuous mixing. The contractor shall provide a platform scale and make arrangements for the use of a certified truck scale of sufficient capacity for calibration and periodic check tests of the feeders or measuring devices as needed during production.

(c) The mixer shall be capable of producing a uniform mixture. Mixing operations shall be continued until all ingredients are distributed evenly throughout the mixture and a uniform mixture, free

of segregation, is obtained. The engineer shall be the sole judge of the adequacy of mixing. The mixer shall be capable of discharging the mixture without undue segregation. The moisture content at the time of mixing shall be such that the moisture content at the time of compaction will be within 85 to 110 percent of the optimum moisture determined.

IV-6 PRIME COAT.

The cost of this material together with the cost of labor, equipment and other costs required in placing such materials, shall be included in the unit price bid per square yard of pavement.

Upon the primed pozzolanic base course shall be placed two (2) courses of asphaltic concrete and shall meet the same requirements as previously stated.

The Contractor may have the option of deviating from these requirements provided he receive the approval of the Engineer. The Contractor must notify the Engineer a sufficient time in advance of his operation.

(c) If approved by the Engineer, the material may be produced by blending aggregate from more than one source. The components of a blend need not be of the same kind of material. The method of blending must meet the approval of the Engineer. The sources of material and the blending proportions shall not be charged during the progress of the work without written permission from the Engineer.

(d) The bituminous materials used in the mixture shall be asphalt of 85-100, 100-120 or 120-150 Penetration grade. The same grade of bituminous material shall be used throughout the work. The Engineer reserves the right to specify the grade to be used. The percentage of residual bitumen shall be 3 to 6%. The Engineer may make such changes in proportions during the progress of the work as he may consider necessary.

(e) *Samples and Tests.*

A ½ gallon sample of the bituminous aggregate mixture for each 5000 tons produced, shall be taken by the Engineer for extraction tests. A minimum of three samples shall be submitted. The sample shall be a composite sample taken from at least five (5) trucks. A one (1) quart sample of the bituminous material being used shall be taken by the Engineer at the same time the bituminous aggregate mixture sample is taken. The sample shall be taken from the line leading to the asphalt bucket or pug mill spray bar or directly from the asphalt bucket or spray bar. Paving asphalt shall be submitted in a one (1) quart friction top can.

(f) *Mixture Composition and Control Factors.*

The Contractor, at his expense, shall submit a sample of 100 pounds of the aggregate to the Engineer which he proposes to use in the bituminous mixture. The sample shall be submitted at least three weeks prior to start of base construction. The aggregate sample shall be taken under the supervision of the Engineer. asphalt shall produce a satisfactory bituminous mixture that will have a strength of at least 100 pounds greater than the minimum requirements shown on the plans. If the material will not produce a satisfactory mixture meeting this requirement, the Contractor shall submit a material that will comply. If the aggregate furnished for design purposes contains some crushed material, the Contractor shall submit with the sample a statement giving the percentage of plus No. 4 material that is crushed. Throughout the improvement this percentage shall be maintained within a minus 5 percentage points of this amount.

(g) The mix to be used shall be prepared as required by the appropriate state specification.

(h) The Engineer may order any tests that he may deem necessary to insure the quality of the work.

VI-III *Construction Procedure.*

(a) Transportation of Bituminous mixes shall be governed by Article 46.14 of the Standard State Specifications.

(b) The subgrade shall be prepared as required in Section II of these specifications. The Contractor shall notify the Board of Local Improvements a sufficient time before laying the base course to allow for an inspection of the subgrade. The base course shall not be placed except in the presence of the Engineer or his representative.

(c) The base course shall be spread by an approved type asphalt spreading and finishing machine. The machine shall meet the requirements of Article 133.3 and its addendums of the State Specifications, or it may be a type approved by the Engineer.

(h) The first layer of the bituminous mixture shall be compacted to a density of not less than 90% of the theoretical density. Succeeding layers or where one layer is used shall be compacted to a density of not less than 90%. The theoretical density shall be computed from the saturated surface dry specific gravity of the aggregate, and the specific gravity of the asphalt at 77 degrees F., or it may be determined by the high pressure air meter. The density of each of the finished layers of bituminous mixes shall be obtained from specimens furnished by the Contractor. Specimens shall be cut by the Contractor from the finished layer with a core drill. The diameter of a specimen shall in no case be less than 3⅞ inches nor more than 4 inches. Four specimens shall be taken for each days run for each layer. When directed by the Engineer, additional specimens shall be taken, but the total number from one day's run shall not exceed 20. The Contractor shall remove the specimens at locations designated by and in the presence of the Engineer and transport them to a location designated by the Engineer. Extreme care shall be taken to avoid damage to the specimens. The holes caused by the removal of the specimens shall be refilled immediately with bituminous aggregate mixture meeting these specifications, compacted and finished to the satisfaction of the Engineer. The cost of the work required in taking and transporting the specimens and in refilling the holes caused by removal of the specimens shall not be paid for separately, but shall be included in the unit price bid per square yard for pavement.

(j) *Tolerance in Thickness.*

It is the intent that the base course shall be constructed to the nominal thickness shown on the plans. Thickness determinations shall be made at such points as the Engineer may select. If thicknesses less than 95% of nominal thickness are encountered, the extent and depth of the deficient area shall be determined and Bituminous Mixture Base Course or Bituminous Concrete Surface Course shall be placed by the Contractor at his expense to bring the deficient area of the base to nominal thickness. If Bituminous Concrete Surface Course is used, it may be placed as part of the surfacing operation.

(k) On the finished base course shall be laid a bituminous concrete course of 1½ inches in thickness, the surface course shall be constructed in accordance with the requirements of Section IV-12 through IV-9 of these Specifications.

P.C.C. Sidewalk removal and replacement where necessary. Concrete crosswalks shall be built according to the Standard City Code of the City of Chicago.

The Concrete shall conform to Class X Concrete (as described in this ordinance for curbs and gutters).

All existing catchbasins which are to be abandoned are located at the intersections of said streets. The above elevations as fixed shall be measured from Chicago City datum as established by the City Council of the City of Chicago.

The roadway(s) of the several street(s) heretofore specified between the points herein described, also the roadway(s) of all intersecting alley(s) extended from the curb line to the street line on necessary side of said specified street(s) between the points herein described shall be so graded by cutting or filling and compacted by rolling with a roller of ten (10) tons weight that after the grading of the roadbed(s) is completed and the pavement herein described placed thereon, the surface of the finished pavement at the center of the roadway of each of said specified street(s) shall be at the elevation of the top of the curbing herein described; and

the surface of the said finished pavement at the summits in the gutters between catchbasins and adjoining the roadway face of the curbing shall be three (3) inches below the top of said curbing, and at the catchbasin inlets in the gutters adjoining the roadway face of the curbings shall be nine (9) inches below the top of said curbing. The slope of the gutters adjoining the roadway face of said curbing shall be uniform from the summits to the catchbasin inlets.

A transverse section of the surface of the finished pavement and gutters shall be an arc of a circle passing through the said gutter elevations and the elevation of the center of said finished roadway at every part of the roadway of said specified street(s) between the points herein described.

In all intersecting alley(s) herein specified at the street lines of said specified street(s) the surface of the finished pavement adjoining the curbing shall be even with the top of the curbing and the surface of the finished pavement at the center of the roadways of said alley(s) shall be three (3)inches below the top of the curbing; and a transverse section of the surface of the finished pavement at the street lines of said specified street(s) shall be an arc of a circle passing through the surface of the pavement adjoining said curbing and the surface of the pavement at the center of said finished roadway(s). The surface of the said pavement thence shall slope gradually to meet the surface of the finished pavement at the curb lines of said specified street(s).

On the sub-grade as formed and compacted shall be spread an insulation course of limestone screenings. Said insulation course shall be one (1) inch in thickness and shall extend across the full width of the roadbed.

On the insulation course as formed and compacted shall be spread a foundation course consisting of a layer of crushed limestone of the best quality, broken so as to pass through a ring of four (4) inches internal diameter and held on a ring of two (2) inches internal diameter. The stone spread shall be well graded as to sizes. It shall be evenly distributed so as to leave no pockets filled with the small size stone. This layer shall be thoroughly rolled with a self propelled three wheel roller, weighing not less than ten (10) tons. The rolling shall begin at the edge of the pavement and the roller shall move parallel with the center line of the roadway. The roller shall progress gradually towards the center of the roadway uniformly lapping each proceeding track, covering the entire surface with the rear wheels and continuing until the stone does not creep or move ahead of the roller. After the crushed limestone has been thoroughly rolled and keyed, limestone screenings shall be applied gradually over the surface and the rolling continued until sufficient screenings have been applied to completely fill the interstices. The screenings shall be swept in with hand brooms to properly fill the voids. The spreading and rolling shall continue until no more screenings will go in dry. No excess of screenings shall be used before applying water. Immediately after the voids have been filled with screenings, the macadam shall be sprinkled until saturated, the sprinkler being followed by a roller. More screenings shall be added if necessary. The sprinkling, sweeping and rolling shall continue until a grout shall be formed of the screening and water that will fill all the voids, and form a wave of grout before the wheels of the roller. The quantity of screening and water necessary to fill the voids shall be determined by the engineer and shall be sufficient to produce a rough, granular surface. The rolling, at all times, shall begin at the sides, and then progress toward the center, thoroughly covering the entire surface with the rear wheels. When compacted, this layer shall measure not less than five (5) inches in thickness.

Upon the finished waterbound macadam base there shall be uniformly applied by an approved type of spreader box, two (2) inch stone to a depth providing a total base course thickness of three (3) inches after final compaction. After shaping to grade and rolling with a ten (10) ton roller three quarter (¾) inch stone chips shall be broadcast and broomed into the surface voids at the rate of fifteen (15) pounds per square yard. Liquid asphalt at a temperature of 140 degrees F. shall be uniformly applied by a pressure distributor at a rate of one and one-half (1½) per gallons per square yard. Stone chips shall again be broadcast and broomed uniformly over the surface at the rate of fifteen (15) pounds per square yard. Liquid asphalt shall be uniformly applied by a pressure distributor at the rate of one-half (½) gallon per square yard. Stone chips shall be broadcast again at the rate of ten (10) pounds per square yard. The surface shall then be thoroughly rolled. The asphalt shall conform to the State Specification for Emulsified Asphalt R. S. 2, Page 640 of Illinois Standard Specifications for Road and Bridge Construction adopted January 2, 1952.

On the said foundation course shall be placed an asphaltic concrete surface course two (2) inches in thickness consisting of an asphaltic concrete mixture conforming to the standard requirements of the Illinois State Division of Highways for Type 1-11 Asphaltic Concrete adopted January 2, 1952, as follows: The asphaltic mix shall consist of a mineral aggregate bonded with the asphaltic cement. The mineral aggregate shall consist of the best quality of crushed gravel or crushed stone in sizes graduated in accordance with the following table, viz:

Passing No. 10 retained on No. 40 sieve	5- 18%
Passing No. 40 retained on No. 50 sieve	7- 22%
Passing No. 80 retained on No. 200 sieve	5- 13%
Passing No. 200 sieve	4- 8%
Bitumen	5- 7%

(Table 45.11 p. 247 State Specifications)

The asphaltic cement shall conform with the standard requirements of the Illinois State Division of Highways for Grade P.A. 6 Paving Asphalt, adopted January 2, 1952. It shall have a flash point (Cleveland open cup) 500 plus Fahrenheit. It shall have penetration at seventy-seven (77) degrees Fahrenheit of seventy-five (75) to eighty-five (85), and at least ninety-nine and five-tenths (99.5) per cent of bitumen shall be soluble in carbon disulphide.

When fifty (50) grams of said paving asphalt is heated in an uncovered tin box five and one-half (5½) centimeters in diameter and three and one-half (3½) centimeters in depth, and is held at a temperature of three hundred and twenty-five (325) degrees Fahrenheit for five (5) hours, then it shall have lost not over two (2) per cent by weight and the pentration of the residue thus obtained shall not be less than seventy (70) per cent of the penetration before such heating. Said penetration being determined as herein described. Said paving

asphalt shall have a ductility of not less than one hundred (100) centimeters being determined by elongating a briquette Dow form of said paving asphalt at uniform rate of five (5) centimeters per minute at a temperature of seventy-seven (77) degrees Fahrenheit.

The paving asphalt and mineral aggregate shall be mixed when heated between three hundred (300) and three hundred fifty (350) degrees Fahrenheit in an approved mixer to produce a homogenous mixture in which all particles of aggregate are coated uniformly. The heated mixture shall be delivered to the pavement in trucks with approved clean tight dump bodies. The temperature when delivered at the street shall be between two hundred and fifty (250) and three hundred fifty (350) degrees Fahrenheit. Upon arrival the asphaltic mixture shall be spread upon the prepared base at a uniform depth and consistency so that the thickness when compacted as herein described will be two (2) inches.

Immediately after the asphalt surface course shall be spread it shall be connected thoroughly and uniformly with a three (3) wheel roller or a tandem roller. The asphalt paving mix shall be dumped first upon approved steel dump pans outside of the area on which it is to bs spread. Immediately thereafter it shall be distributed into place with shovels and spread with rakes in layers of uniform density and correct depth, unless a spreading machine is used. If a spreading machine is used it shall be of a type approved by the Board of Local Improvements. Immediately after the surface course mixture is placed it shall be compacted thoroughly with a three wheel roller or a tandem roller. One (1) or more three-wheel rollers and one (1) or more tandem rollers will be required. The actual number of such rollers to be determined by the Engineer in accordance with the progress of the work. If the production of the asphalt plant delivered to the pavement exceeds seventy-five (75) tons per hour additional rollers shall be furnished as directed by said Engineer. After a final rolling the asphalt surface course shall at all points have a density of not less than ninety-five (95) per cent of the maximum possible density of a voidless pavement composed of the same materials in like proportions.

IV-2 Pozzolanic Base Course

On the subgrade as formed and compacted shall be placed and compacted to the depth shown on the plans and as herein provided.

(a) The pozzolanic base course shall be constructed in layers not more than six (6) inches (compacted) in thickness. When the thickness specified is more than six (6) inches the base course shall be constructed in two (2) or more approximately equal layers. Each layer shall be deposited, full-lane width, directly on the prepared subgrade or on the preceeding layers of compacted mixture with a mechanical spreader box of a type approved by the Engineer. Where the base must be constructed in more than one layer, the previous layer shall be maintained in a moistened condition until the succeeding layer is placed. After having been tested for density and approved by the Engineer, the previous layer shall be raked to a depth of one (1) inch and dampened with water immediately prior to placing the succeeding layer so that the layers are in it together. The second layer must be placed the same way as the first layer. The Engineer of the Board of Local Improvements shall determine when the base course shall be constructed in one or more lifts. When placed, the pozzolanic mixture shall be free from segregation and shall require minimum blanding and manipulation. Immediately after placing the mixture shall be compacted with a pneumatic-tired roller, or with a vibratory compactor, or with a combination of the two. The base course, shall be given a final rolling with a three wheel or tandem roller. If the pozzolanic base is placed on gradual sub-base, the pozzolanic base shall be compacted to at least 100% of maximum density except that if more than one layer is required the first layer shall be compacted to 97% of maximum density and succeeding layers shall be compacted to 100% of maximum density.

(b) All pozzolanic mixture shall be placed and compacted the same day as it is mixed. The entire base course within the increment of work shall be completed within 24 hours.

(c) Except in specific cases, when otherwise permitted by the Engineer, the pozzolanic base course mixture shall be placed between April 15 and October 15 and only when the temperature is 40 or more.

(d) The three wheel or tandem rollers shall weigh from 6 to 10 tons and shall weigh not less than 200 pounds nor more than 325 pounds per inch width of roller. The compression developed by the pneumatic tired roller shall be not less than 225 pounds per inch of tire width.

(d) Samples: The contractor, shall at his own expense, submit to the Engineer a minimum of 25 pounds of lime, 100 pounds of fly ash and 150 pounds of the coarse aggregate which he proposed for use in the pozzolanic mixture. The lime, when sampled, shall immediately be placed in a sealed container and shall be kept sealed. Samples shall be furnished at least 45 days prior to the construction of the pozzolanic base course. The samples submitted will be tested for acceptance of materials and also to determine whether or not they will produce a satisfactory mixture; and will be used to determine preliminary proportions for the mixture composition.

IV-4 COMPOSITION OF MIXTURE.

(a) The lime, pozzolan and aggregate shall be proportioned within the following limits on a dry-weight basis:

PERCENT BY WEIGHT OF TOTAL DRY MIXTURE

Ingredient	*Gravel, Crushed Stone, Crushed Slag or Aggregate Blend*	*Boiler Slag*
Lime	2- 5	2- 4
Pozzolan	8-16	15-30
Aggregate	79-90	56-78

(b) The actual proportions of lime, pozzolan, water and aggregate will be set by the Engineer before work begins and will be based on tests conducted on mixtures composed of samples of the constituent materials furnished by the Contractor. The right is reserved by the Engineer to make such changes in proportions during the progress of the work as he may consider necessary.

(c) The composition of the mixture shall be such that when molded into cylinders, cured and tested as stated in the following paragraph, each cylinder shall have a minimum compressive strength of 450 psi and a maximum weight loss of 14% after 12 cycles of freezing and thawing.

(d) Test cylinders shall be molded at the optimum moisture content and maximum density in accordance with AASHO Designation T 160, Method C, except that the 5 lift requirement is replaced with 3 lifts and no replacement of coarse aggregate (+¾ inch sieve) is made. The molded specimens shall immediately be placed in an oven with forced air circulation for 7 days at 100+3 F. At the end of 7 days, the test cylinders for compressive strength testing shall be removed from the containers, allowed to cool to room temperature, soaked for four hours, capped and broken for compressive strength within one hour of time of removal from water. The specimens to be tested for freeze-thaw resistance shall be cured in the same manner as the strength specimens without the 4 hour soaking period. After curing the specimens shall be subjected to 12 cycles of freezing and thawing in accordance with AASHO Designation D-560, Sections 5, 9 and 10 pertaining to specimen No. 2 (weight loss specimen).

IV-5 MIXING.

(a) The constituents of the mixture shall be accurately proportioned and thoroughly mixed in a mechanical mixer at a central mixing plant. The measuring devices for proportioning the mixer, either by volume or by weight shall be of such accuracy that the proportions of the mixture based on total dry weight will be maintained within the following tolerances:

Lime	+0.3 percent by weight
Fly ash	+1.5 percent by weight
Aggregate	+2.0 percent by weight

(b) The equipment used must be provided with means, meeting with approval of the Engineer, for calibration and check tests of measuring devices. In all plants, the water shall be proportioned by weight or volume and there shall be means by which the Engineer may readily verify the amount of water per batch or the rate of flow for continuous mixing. The contractor shall provide a platform scale and make arrangements for the use of a certified truck scale of sufficient capacity for calibration and periodic check tests of the feeders or measuring devices as needed during production.

(c) The mixer shall be capable of producing a uniform mixture. Mixing operations shall be continued until all ingredients are distributed evenly throughout the mixture and a uniform mixture, free of segregation, is obtained. The engineer shall be the sole judge of the adequacy of mixing. The mixer shall be capable of discharging the mixture without undue segregation. The moisture content at the time of mixing shall be such that the moisture content at the time of compaction will be within 85 to 110 percent of the optimum moisture determined.

IV-6 PRIME COAT.

It shall have a dial and pressure gauge, spray bars of various lengths, and a hand spray bar for applying materials at street and alley returns and radius corners.

(c) A tank thermometer to determine the temperature of the contents of the tank and a tachometer to enable the driver to maintain the constant speed necessary for the correct application of the specified quantity of bitumen. The cost of this material together with the cost of labor, equipment and other costs required in placing such materials, shall be included in the unit price bit per square yard of pavement.

Upon the primed pozzolanic base course shall be placed two (2) courses of asphaltic concrete and shall meet the same requirements as previously stated.

SECTION VI

VI-I This item shall consist of a mixture of aggregate (crushed stone) and Bituminous material, plant mixed and constructed on a prepared subgrade in accordance with the requirements of the Board of Local Improvements. The base course shall be laid according to the lines and grades as established by the Engineer. The thickness will be as shown on the standards or plans or as established by the Engineer.

VI-II All materials shall conform to the requirements of the Standard Specifications for Road and Bridge construction, State of Illinois, adopted August 1, 1968 and the supplemental specifications in effect on the date of invitation for bids.

(a) The sources of supply shall be State approved. Satisfactory evidence shall be presented by the material supplier as to the ability of the source of supply to furnish the aggregate in proper quantity and meet the requirements as to grading and quality.

(b) Gradation of the aggregate shall meet the following requirements:

Passing 1″ sieve	100%
Passing ½″ sieve	60-100%
Passing No. 4 sieve	40-65%
Passing No. 8 sieve	25-55%
Passing No. 200 sieve	5-15%

The Contractor may have the option of deviating from these requirements provided he receive the approval of the Engineer. The Contractor must notify the Engineer a sufficient time in advance of his operation.

(c) If approved by the Engineer, the material may be produced by blending aggregate from more than one source. The components of a blend need not be of the same kind of material. The method of blending must meet the approval of the Engineer. The sources of material and the blending proportions shall not be charged during the progress of the work without written permission from the Engineer.

(d) The bituminous materials used in the mixture shall be asphalt of 85-100, 100-120 or 120-150 Penetration grade. The same grade of bituminous material shall be used throughout the work. The Engineer reserves the right to specify the grade to be used. The percentage of residual bitumin shall be 3 to 6%. The Engineer may make such changes in proportions during the progress of the work as he may consider necessary.

(e) *Samples and Tests.*

A ½ gallon sample of the bituminous aggregate mixture for each 5000 tons produced, shall be taken by the Engineer for extraction tests. A minimum of three samples shall be submitted. The sample shall be a composite sample taken from at least five (5) trucks. A one (1) quart sample of the bituminous material being used shall be taken by the Engineer at the same time the bituminous aggregate mixture sample is taken. The sample shall be taken from the line leading to the asphalt bucket or pugmill spray bar or directly from the asphalt bucket or spray bar. Paving asphalt shall be submitted in a one (1) quart friction top can.

(f) *Mixture Composition and Control Factors.*

The Contractor, at his expense, shall submit a sample of 100 pounds of the aggregate to the Engineer which he proposes to use in the bituminous mixture. The sample shall be submitted at least three weeks prior to start of base construction. The aggregate sample shall be taken under the supervision of the Engineer. At the time of submitting the sample, Contractor shall state the source of the aggregate and the source and grade of the asphalt that he will use. The sample submitted to the Engineer when mixed with the designated grade of asphalt shall produce a satisfactory bituminous mixture that will have a strength of at least 100 pounds greater than the minimum requirements shown on the plans. If the material will not produce a satisfactory mixture meeting this requirement, the Contractor shall submit a material that will comply. If the aggregate furnished for design purposes contains some crushed material, the Contractor shall submit with the sample a statement giving the percentage of plus No. 4 material that is crushed. Throughout the improvement this percentage shall be maintained within a minus 5 percentage points of this amount.

(g) The mix to be used shall be prepared as required by the appropriate state specification.

(h) The Engineer may order any tests that he may deem necessary to insure the quality of the work.

VI-III *Construction Procedure.*

(a) Transportation of Bituminous mixes shall be governed by Article 46.14 of the Standard State Specifications.

(b) The subgrade shall be prepared as required in Section II of these specifications. The Contractor shall notify the Board of Local Improvements a sufficient time before laying the base course to allow for an inspection of the subgrade. The base course shall not be placed except in the presence of the Engineer or his representative.

(c) The base course shall be spread by an approved type asphalt spreading and finishing machine. The machine shall meet the requirements of Article 133.3 and its addendums of the State Specifications, or it may be a type approved by the Engineer.

(d) The base course shall be constructed only when the temperature in the shade is at least 40 degrees F. In specific cases, the Engineer may order a waiver of this limitation.

(e) The base course mix shall be delivered at a temperature of 225 degrees to 325 degrees F.

(f) The base course may be constructed in one or more courses, the decision shall be made by the Engineers for each project.

(g) The base course shall be compacted with three wheel rollers or tandem rollers weighing

from 6 to 12 tons and shall not weigh less than 200 pounds nor more than 400 pounds per inch of width of rollers. Vibrating rollers will be permitted if approved by the Engineer.

(h) The first layer of the bituminous mixture shall be compacted to a density of not less than 90% of the theoretical density. Succeeding layers or where one layer is used shall be compacted to a density of not less than 90%. The theoretical density shall be computed from the saturated surface dry specific gravity of the aggregate, and the specific gravity of the asphalt at 77 degrees F., or it may be determined by the high pressure air meter. The density of each of the finished layers of bituminous mixes shall be obtained from specimens furnished by the Contractor. Specimens shall be cut by the Contractor from the finished layer with a core drill. The diameter of a specimen shall in no case be less than 3⅞ inches nor more than 4 inches. Four specimens shall be taken for each day's run for each layer. When directed by the Engineer, additional specimens shall be taken, but the total number from one day's run shall not exceed 20. The Contractor shall remove the specimens at locations designated by and in the presence of the Engineer and transport them to a location designated by the Engineer. Extreme care shall be taken to avoid damage to the specimens. The holes caused by the removal of the specimens shall be refilled immediately with bituminous aggregate mixture meeting these specifications, compacted and finished to the satisfaction of the Engineer. The cost of the work required in taking and transporting the specimens and in refilling the holes caused by removal of the specimens shall not be paid for separately, but shall be included in the unit price bid per square yard for pavement.

(i) The stability of the completed base course shall be not less than 900 pounds as required by the State of Illinois.

(j) *Tolerance in Thickness.*

It is the intent that the base course shall be constructed to the nominal thickness shown on the plans. Thickness determinations shall be made at such points as the Engineer may select. If thicknesses less than 95% of nominal thickness are encountered, the extent and depth of the deficient area shall be determined and Bituminous Mixture Base Course or Bituminous Concrete Surface Course shall be placed by the Contractor at his expense to bring the deficient area of the base to nominal thickness. If Bituminous Concrete Surface Course is used, it may be placed as part of the surfacing operation.

(k) On the finished base course shall be laid a bituminous concrete course of 1½ inches in thickness, the surface course shall be constructed in accordance with the requirements of Section IV-12 through IV-9 of these Specifications.

P.C.C. Sidewalk removal and replacement where necessary. Concrete crosswalks shall be built according to the Standard City Code of the City of Chicago.

The Concrete shall conform to Class X Concrete (as described in this ordinance for curbs and gutters).

All existing catchbasins which are to be abandoned are located at the intersections of said streets. Where existing catchbasins are to be abandoned, the outlet pipe connection from the catchbasin the the sewer shall be plugged and properly sealed and the corbel courses broken down and the catchbasin cleaned and filled with suitable material.

Two (2) Inlets to be abandoned where necessary.

P.C.C. Driveways removal and replacement.

Additional masonry where necessary.

Said work is to be done in a workmanlike manner under the superintendence of the Board of Local Improvements of the said City of Chicago.

10. City agrees not to erect nor allow to be erected on property of the City any structure which will constitute an obstruction, nor will it conduct nor permit to be conducted any activity on property of the City which will interfere with the proper operation of the control tower being constructed and operated on the leased premises.

11. Subject to the initial term of this lease being extended to December 31, 1993, upon the City obtaining title in fee to the premises as provided above, the Government shall have the right to extend this lease for an additional term of twenty (20) years, to terminate on the 31st day of December, 2013, upon the same terms and conditions contained herein. The Government shall indicate its intention to exercise such option by notice in writing to the City given not less than sixty (60) days prior to the expiration date of the initial term, as extended. If the interest acquired by the City is less than title in fee, upon termination of the period applicable to that situation, as described above, and upon the City obtaining right to an additional period of possession, the Government shall have a right to extend this lease to the termination of that period or 31 December 2013, whichever occurs first.

Should a mutually acceptable settlement be made hereunder, the parties shall enter into a supplemental agreement hereto effecting such agreement. Failure to agree to any such equitable adjustment shall be a dispute concerning a question of fact within the meaning of Clause 8 of this lease.

8. (a) Except as otherwise provided in this contract, any dispute concerning a question of fact arising under this contract which is not disposed of by agreement shall be decided by the Contracting Officer, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the lessor. In connection with any appeal proceeding under this clause, the lessor shall be afforded an opportunity to be heard and to offer evidence in support of its appeal. Pending final decision of a dispute hereunder, the lessor shall proceed diligently with the performance of the contract and in accordance with the Contracting Officer's decision.

(b) This "Disputes" clause does not preclude consideration of law questions in connection with decisions provided for in paragraph (a) above: *Provided,* That nothing in this contract shall be construed as making final the decision of any administrative official, representative, or board on a question of law.

~~9. EQUAL OPPORTUNITY CLAUSE.~~

(The following clause is applicable unless this contract is exempt under the rules, regulations, and relevant orders of the Secretary of Labor (41 CFR, ch. 60).)

During the performance of this contract, the Contractor agrees as follows:

(a) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Contracting Officer setting forth the provisions of this Equal Opportunity clause.

(b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(c) The Contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency Contracting Officer, advising the labor union or workers' representative of the Contractor's commitments under this Equal Opportunity clause, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(d) The Contractor will comply with all provisions of Executive Order No. 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(e) The Contractor will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting

agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(f) In the event of the Contractor's noncompliance with the Equal Opportunity clause of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended, in whole or in part, and the Contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

The Contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided, however,* That in the event the Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

Nothing herein shall require the furnishing to the general public of the use of any facility customarily furnished by the Lessor solely to tenants, their employees, customers, patients, clients, guests and invitees.

(c) It is agreed that the Lessor's noncompliance with the provisions of this section shall constitute a material breach of this lease. In the event of such noncompliance, the Government may take appropriate action to enforce compliance, may terminate this lease, or may pursue such other remedies as may be provided by law. In the event of termination, the Lessor shall be liable for all excess costs of the Government in acquiring substitute space, including but not limited to the cost of moving to such space. Substitute space shall be obtained in as close proximity to the Lessor's building as is feasible and moving costs will be limited to the actual expenses thereof as incurred.

(d) It is further agreed that from and after the date hereof the Lessor will, at such time as any agreement is to be entered into or a concession is to be permitted to operate, include or require the inclusion of the foregoing provisions of this section in every such agreement or concession pursuant to which any person other than the Lessor operates or has the right to operate any facility. Nothing herein contained, however, shall be deemed to require the Lessor to include or require the inclusion of the foregoing provisions of this section in any existing agreement or concession arrangement or one in which the contracting party other than the Lessor has the unilateral right to renew or extend the agreement or arrangement, until the expiration of the existing agreement or arrangement and the unilateral right to renew or extend. The Lessor also agrees that it will take any and all lawful actions as expeditiously as possible, with respect to any such agreement as the contracting agency may direct, as a means of enforcing the intent of this section, including, but not limited to, termination of the agreement or concession and institution of court action.
